

**SCHOOL OF ENGINEERING AND TECHNOLOGY**  
**Master of Science (Information Technology)**

**Programme Code: SET0128**  
**Duration- 2 Years Full Time**

**PROGRAM STRUCTURE**  
**AND**  
**CURRICULUM & SCHEME OF EXAMINATION**  
**2020**

## **1. Standard Structure of the Program at University Level**

---

### **1.1 Vision, Mission and Core Values of the University**

---

#### **Vision of the University**

**To serve the society by being a global University of higher learning in pursuit of academic excellence, innovation and nurturing entrepreneurship.**

#### **Mission of the University**

- 1. Transformative educational experience**
- 2. Enrichment by educational initiatives that encourage global outlook**
- 3. Develop research, support disruptive innovations and accelerate entrepreneurship**
- 4. Seeking beyond boundaries**

#### **Core Values**

- Integrity**
- Leadership**
- Diversity**
- Community**

**Note: Detailed Mission Statements of University can be used for developing Mission Statements of Schools/ Departments.**

## Vision and Mission of the School

---

### **Vision of the School**

**To become a globally acclaimed institution of higher learning in engineering and technology promoting excellence in research, innovation and entrepreneurship**

### **Mission of the School**

- 1. To impart quality education with strong industry & academic connectivity in the expanding fields of Engineering and Technology in a conducive and enriching learning environment.**
- 2. To product technocrats equipped with technical & soft skills and experiential learning required to stay current with the modern tools in emerging technologies to fulfill professional responsibilities and uphold ethical values.**
- 3. To inculcate a culture of interdisciplinary research, innovation and entrepreneurship to provide sustainable solutions to meet the growing challenges and societal needs.**
- 4. To foster collaborative learning and to play adaptive leadership role in professional career and pursuit of higher education through effective mentoring and counseling.**

### **Core Values**

- Industry & Academic Connectivity**
- Experiential learning**
- Interdisciplinary research**
- Global**

## 1.2 Vision and Mission of the Department

---

### **Vision of the Department**

**To be recognized as the fountainhead of excellence in technical knowledge and research in computer science and engineering to attract students and scholars across the globe**

### **Mission of the Department**

- 1. To strengthen core competency of students to be successful, ethical, effective problem solver in Computer Science & Engineering through analytical learning.**
- 2. To promote interdisciplinary research & innovation-based activities in emerging areas of technology globally**
- 3. To facilitate and foster the industry-academia collaboration to enhance entrepreneurship skills and acquaintance with corporate culture.**
- 4. To inculcate in them a higher degree of social consciousness and moral values towards solving interdisciplinary societal problems using industry-academia collaboration**

### **Core Values**

- Competency**
- Global**
- Entrepreneurship Skills**
- Interdisciplinary research**

### 1.3 Programme Educational Objectives (PEO)

---

#### 1.3.1 Writing Programme Educational Objectives (PEO)

---

Program educational objectives are broad statements that describe the career and professional accomplishments that the program is preparing graduates to achieve.

The Program Educational Objectives (PEOs) of UG Program in Computer Science & Engineering are:

**PEO-1** The graduates will establish themselves as professionals by solving real-life problems using exploratory and analytical skills acquired in the field of Computer Science and Engineering.

**PEO-2** The graduates will provide sustainable solutions to ever changing interdisciplinary global problems through their Research & Innovation capabilities.

**PEO-3** The graduates will become employable, successful entrepreneur as an outcome of Industry-Academia collaboration.

**PEO-4** The graduates will embrace professional code of ethics while providing solution to multidisciplinary social problems in industrial, entrepreneurial and research environment to demonstrate leadership qualities

#### Methods of Forming PEO's

- STEP 1 : The needs of the Nation and society are identified through scientific publications, industry interaction and media.
- STEP 2. Taking the above into consideration, the PEOs are established by the Coordination Committee of the department.
- STEP 3. The PEOs are communicated to the alumni and their suggestions are obtained.
- STEP 4. The PEOs are communicated to all the faculty members of the department and their feedback is obtained.
- STEP 5. The PEOs are then put to the Board of Studies of the department for final approval.

*[Note: Prepare a file for the same, how you arrive for PEO's]*

### 1.3.2 Map PEOs with Mission Statements:

DEPARTMENT PEOs  DEPT OF CSE MISSION STATEMENTS	1. The graduates will establish themselves as professionals by solving real-life problems using exploratory and analytical skills acquired in the field of Computer Science and Engineering.	2. The graduates will be able to provide sustainable solutions to ever changing interdisciplinary global problems through their Research & Innovation capabilities.	3. The graduates will become employable, successful entrepreneur and innovator as an outcome of Industry-Academia collaboration.	4. The graduates will be able to embrace professional code of ethics while providing solution to multidisciplinary social problems in industrial, entrepreneurial and research environment to demonstrate leadership qualities.	
1. To strengthen core competency of students to be successful, ethical, effective problem solver in Computer Science & Engineering through analytical learning.	3	3	2	2	10/12
2. To promote interdisciplinary research & innovation based activities in emerging areas of technology globally.	2	3	2	2	9/12
3. To facilitate and foster the industry-academia collaboration to enhance entrepreneurship skills and acquaintance with corporate culture.	2	2	3	3	10/12
4: To inculcate in them a higher degree of social consciousness and moral values towards solving interdisciplinary societal problems using industry-academia collaboration	2	2	2	3	9/12
	9/12	10/12	9/12	10/12	83%

Enter correlation levels 1, 2, or 3 as defined below:

- 1. Slight (Low)    2. Moderate (Medium)    3. Substantial (High)**

If there is no correlation, put “-“

### 1.3.3 Program Outcomes (PO's)

<b>PO1:</b>	<b>Computing Knowledge:</b>	Ability to develop and implement optimal solutions to complex computing problems using industry-recognized best practices and standards.
<b>PO2:</b>	<b>Problem Analysis:</b>	Apply problem-solving and technical skills to analyze complex problems and propose feasible computing solutions using fundamental principles of mathematics and computing sciences.
<b>PO3:</b>	<b>Design/Development of Solutions:</b>	Design and develop the solutions to practical and complex engineering problems for welfare of society.
<b>PO4:</b>	<b>Research and Development:</b>	Apply research-based knowledge and methodologies to analyze the problem, interpretation of data and synthesis of the information using technical tools.
<b>PO5:</b>	<b>Modern Tool Usage:</b>	Create, select, and apply appropriate techniques, resources, and modern IT tools including application and modeling to computer applications with an understanding of the limitations.
<b>PO6:</b>	<b>Innovation and Entrepreneurship:</b>	Use innovative approach to develop opportunities to create value and wealth for the betterment of the individual and society at large.
<b>PO7:</b>	<b>Environment and Sustainability:</b>	Understand the impact of the professional system solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
<b>PO8:</b>	<b>Personal and Professional Ethics:</b>	Apply ethical decision making in the development, implementation, and management during professional life.
<b>PO9:</b>	<b>Communication:</b>	Ability to communicate effectively in both manner, verbally and written, to provide integrated solution to customers/users or peers.
<b>PO10:</b>	<b>Life-Long Learning:</b>	Continue the process of life-long learning through professional activities; adapt themselves with ease to new technologies,
<b>PSO1:</b>	<b>Computer Science</b>	Use and apply current technical concepts and practices in the core areas of computer science, i.e. networking, data management, software engineering, computer security and artificial intelligence.
<b>PSO2:</b>	<b>Information Technology</b>	To cater to the demands of the IT and IT-enabled sectors through strong theoretical foundation with high quality teaching complemented with extensive practical training.

### 1.3.4 Mapping of Program Outcome Vs Program Educational Objectives

---

Mapping	PEO1	PEO2	PEO3	PEO4
<b>PO1:</b>	3	3	2	1
<b>PO2:</b>	3	3	3	1
<b>PO3:</b>	2	2	3	3
<b>PO4:</b>	2	3	2	2
<b>PO5:</b>	1	2	2	3
<b>PO6:</b>	1	1	2	3
<b>PO7:</b>	1	1	2	3
<b>PO8:</b>	1	1	3	2
<b>PO9:</b>	3	2	3	1
<b>PO10:</b>	2	3	1	1
<b>PSO1:</b>	2	3	1	3
<b>PSO2:</b>	3	3	2	2

*1. Slight (Low)*

*2. Moderate (Medium)*

*3. Substantial (High)*

### 1.3.5 Program Outcome Vs Courses Mapping Table<sup>1</sup>:

---

*1. Slight (Low)*

*2. Moderate (Medium)*

*3. Substantial (High)*

---

<sup>1</sup> Cel value will contain the correlation value of respective course with PO.

### 1.3.5.2 COURSE ARTICULATION MATRIX<sup>2</sup>

---

**1-Slight (Low)**

**2-Moderate (Medium)**

**3-Substantial (High)**

---

<sup>2</sup> Each course outcome (Based on Blooms Taxonomy-CO1, CO2, CO3, CO4, CO5, and CO6) of the course needs to map with PO. This table evolves once faculty has mapped each course outcomes of their respective course with PO's.

---

## Course Outcome

- **Course Outcomes**–What is it?
  - Course outcomes (COs) are clear statements of what a student should be able to demonstrate on completion of a course.
  - COs should be assessable and measurable knowledge, skills, abilities and attitudes that student attains by the end of the course.
  - It is generally good idea to identify between 4 and 7 outcomes.
  - All courses in a particular programme shall have their own PO.
  - Each CO is mapped to relevant PO.
  - The teaching learning process and assessment process are to be designed in a way to achieve the COs.

## Beginning words for Course Outcome:

Active verbs developed based on Bloom's Taxonomy

Knowledge	Understand	Apply	Analyze	Evaluate	Create
define	explain	solve	analyze	reframe	design
identify	describe	apply	compare	criticize	compose
describe	interpret	illustrate	classify	evaluate	create
label	paraphrase	modify	contrast	order	plan
list	summarize	use	distinguish	appraise	combine
name	classify	calculate	infer	judge	formulate
state	compare	change	separate	support	invent
match	differentiate	choose	explain	compare	hypothesize
recognize	discuss	demonstrate	select	decide	substitute
select	distinguish	discover	categorize	discriminate	write
examine	extend	experiment	connect	recommend	compile
locate	predict	relate	differentiate	summarize	construct
memorize	associate	show	discriminate	assess	develop
quote	contrast	sketch	divide	choose	generalize
recall	convert	complete	order	convince	integrate
reproduce	demonstrate	construct	point out	defend	modify

# TERM-I

---

<b>School: SET</b>		<b>Batch : 2020-19</b>	
<b>Program:</b>		<b>Current Academic Year: 2020-19</b>	
<b>Branch: CSE</b>		<b>Semester: III</b>	
1	Course Code	<b>ARP203</b>	Course Name : <b>Aptitude Reasoning and Business Communication Skills-Basic</b>
2	Course Title	<b>: Aptitude Reasoning and Business Communication Skills-Basic</b>	
3	Credits	2	
4	Contact Hours (L-T-P)	0-0-4	
Course Status			
5	Course Objective	To enhance holistic development of students and improve their employability skills. To provide a 360 degree exposure to learning elements of Business English readiness program, behavioural traits, achieve softer communication levels and a positive self-branding along with augmenting numerical and altitudinal abilities. To step up skill and upgrade students' across varied industry needs to enhance employability skills. By the end of this semester, a student will have entered the threshold of his/her 1 <sup>st</sup> phase of employability enhancement and skill building activity exercise.	
6	Course Outcomes	<p>CO1: <i>At the end of the session this activity will help to ascertain a student's skill and competency level which will lead to effective mapping of his skills and competencies and an effective training need identification and training need analysis model can be drawn</i></p> <p>CO2: <i>At the end of the session a student will have a heightened sense of self awareness, raised levels of self-esteem &amp; self-effectiveness, will have developed a positive mental frame of mind helping a student become more evolved in his/her life .</i></p> <p>CO3: <i>At the end of the session the program would have instilled positive thinking and professional ethics in students and reinforce positive attitude building</i></p> <p>CO4: <i>At the end of the session a student would have learned how to build positive emotional competence in self and learn GOAL Setting and SMART Goals technique</i></p> <p>CO5: <i>At the end of the session a student would have enhanced LSRWG and P (Listening Speaking Reading Writing Grammar and Pronunciation)   Verbal Abilities - 1</i></p> <p>CO6: <i>At the end of the session a student would have Understanding of AMCAT + ELITMUS Study patterns for Quantitative aptitude and Logical   Analytical Reasoning</i></p>	
7	Course Description	This Level 1 blended training approach equips the students for Industry employment readiness and combines elements of soft skills and numerical abilities to achieve this purpose.	
8	Outline syllabus – ARP 203		
	<b>Unit 1</b>	<b>BELLS ( Building Essential Language and Life Skills)</b>	<b>CO Mapping</b>
	A	<i>Know Yourself: Core Competence. A very unique and interactive approach through an engaging questionnaire to ascertain a student's current skill level to design, architect and expose a student to the right syllabus as also to identify the correct TNI/TNA levels of the student.</i>	CO1
	B	Techniques of Self Awareness   Self Esteem & Effectiveness  Building Positive Attitude   Building Emotional Competence	CO2
	C	Positive Thinking & Attitude Building   Goal Setting and SMART Goals – Milestone Mapping   Enhancing L S R W G and P (Listening Speaking Reading Writing Grammar and Pronunciation)   Verbal Abilities - 1	CO3,CO4,CO5
	<b>Unit 2</b>	<b>Introduction to APTITUDE TRAINING- Reasoning- Logical/ Analytical</b>	
	A	Syllogism   Letter Series   Coding, Decoding , Ranking & Their Comparison Level-1	CO6

	B	Number Puzzles	CO6
	C	Selection Based On Given Conditions	CO6
	<b>Unit 3</b>	<b>Quantitative Aptitude</b>	CO6
	A	Number Systems Level 1   Vedic Maths Level-1	CO6
	B	Percentage ,Ratio & Proportion   Mensuration - Area & Volume  Algebra	CO6
	<b>Weightage Distribution</b>	<i>Class Assignment/Free Speech Exercises / JAM – 60%   Group Presentations/Mock Interviews/GD/ Reasoning, Quant &amp; Aptitude – 40%</i>	
	<b>Text book/s*</b>	<i>Wiley's Quantitative Aptitude-P Anand   Quantum CAT – Arihant Publications   Quicker Maths- M. Tyra   Power of Positive Action (English, Paperback, Napoleon Hill)   Streets of Attitude (English, Paperback, Cary Fagan, Elizabeth Wilson) The 6 Pillars of self-esteem and awareness – Nathaniel Brandon   Goal Setting (English, Paperback, Wilson Dobson</i>	

## Syllabus: MCL111 Database Management Systems Lab

<b>School: SET</b>		<b>Batch: 2020</b>	
<b>Program: M.Sc.</b>		<b>Current Academic Year: 2020-2020</b>	
<b>Branch: CSE</b>		<b>Semester: 3</b>	
1	Course Code	MCL 111	
2	Course Title	Database Management Systems Lab	
3	Credits	1	
4	Contact Hours (L-T-P)	0-0-2	
	Course Status	Compulsory	
5	Course Objective	<ul style="list-style-type: none"> <li>• To Develop efficient SQL programs to access Oracle databases</li> <li>• Build database using Data Definition Language Statements</li> <li>• Perform operations using Data Manipulation Language statements like Insert, Update and Delete</li> </ul>	
6	Course Outcomes	<p>By the end of this course you will be able to:</p> <p>CO1: Understand the concept of SQL commands in DBMS.</p> <p>CO2: Create &amp; Perform operations using DDL , DML&amp; Grouping Clauses .</p> <p>CO3: Manipulate your data using Sub- queries &amp; Joins</p> <p>CO4: Implementation of Trigger &amp; Cursors</p> <p>CO5: Solve problems using Procedures &amp; Functions</p> <p>CO6: Design &amp; develop database for real life applications.</p>	
7	Course Description	<p>An introduction to the design and creation of relational databases. Create database-level applications and tuning robust business applications. Lab sessions reinforce the learning objectives and provide participants the opportunity to gain practical hands-on experience.</p>	
8	Outline syllabus		CO Mapping
	<b>Unit 1</b>	<b>Practical based DDL, DML commands</b>	
		Classification SQL, Data types of SQL/Oracle , Create table , Alter table and drop table, INSERT, SELECT , UPDATE & DELETE command	CO1, CO2
	<b>Unit 2</b>	<b>Practical based on Grouping Clauses GROUP BY ORDER BY &amp; GROUP BY HAVING</b>	
		Briefly explain Group by, order by , having clauses with examples. <b>Aggregate functions:</b> sum, avg, count, max, min	CO1, CO2
	<b>Unit 3</b>	<b>Practical based on Sub- queries, JOINS &amp;</b>	
		Related example of Sub- queries, Joins and related examples,	CO1, CO3

	<b>Unit 4</b>	<b>Trigger &amp; Cursors</b>			CO4
		Program related with Trigger & Cursors			
	<b>Unit 5</b>	<b>Procedures &amp; Functions</b>			CO5, CO6
		Applying Procedures & Functions			
		Develop Real life Applications			
<b>Value Added Practicals:</b> Applications such as Banking ,Library,Pay roll, University etc..					
	Mode of examination	Jury/Practical/Viva			
	Weightage Distribution	CA	MTE	ETE	
		60%	0%	40%

	Course Status	Compulsory/Elective	
5	Course Objective	To implement Java language syntax and semantics and concepts such as classes, objects, inheritance, polymorphism, packages and multithreading.	
6	Course Outcomes (must be 6 COs, following verbs given in Bloom's Taxonomy)	CO1: Setting Java environment and executing Java Programs CO2: Understand and formulate the problems in basic programming constructs CO3: Applying OOP concepts to solve real world problems CO4: Implement inheritance and polymorphism features of Java CO5: Implementing multithreading to enhance efficiency and handle run time errors CO6: Develop Java programs for software development	
7	Course Description	Apply features of OOPS and Java Programming including objects, classes, methods, parameter passing, information hiding, inheritance and polymorphism are discussed.	
8	Outline syllabus		CO Mapping
	<b>Unit 1</b>	<b>Jdk, IDE installation and program execution</b>	
		Installing jdk, setting path, Installation and uses of IDE, Writing Java programs, program execution, JVM, JVM for other operating systems, .class files, running byte code in different platforms	CO1
	<b>Unit 2</b>	<b>Programming revisited</b>	
		Programs on different datatypes, promotion rules in expressions, narrowing & type casting, logical-bit wise-arithmetic operators, Programs using if .. else, switch .. case statements, for, while, do .. while loop control structures, break and continue Programs using command line arguments, taking input from keyboard, Arrays in Java, nested control structures	CO2, CO3
	<b>Unit 3</b>	<b>class , object and constructor</b>	
		Programs to define classes, defining data members &	CO2, CO3

		member function, create objects, accessing members of a class through objects, Programs to define constructors, initializing instance variables, method overloading, constructor overloading, Programs to use static members, accessing static members, string handling methods		
	<b>Unit 4</b>	<b>Inheritance, package and Interface</b>		
		Programs on different types of inheritance, using super, constructor chaining, method overriding, Programs to use final variables, methods and classes, creat abstract classe, achieving multiple inheritance through interfaces, inheritance in interfaces, Programs to create packages, import packages, role of access modifiers in default, private, protected and public mode	CO3,CO4,CO6	
	<b>Unit 5</b>	<b>I/O, Exception and Multithreading</b>		
		Programs to use try.. catch.. finally for exception handling, throw user defined exceptions, uses of throws, nested try catch, rethrowing exceptions, Programs to use Stream class to read and write in a File, Programs to define, run and synchronize multiple threads by extending Thread class and implementing Runnable interface.	CO3,CO5,CO6

### List of Experiments

Unit No	S.No	Name of the Practical
1	1.1	Write a Java program to print 'Hello' on screen and then print your name on a separate line
	1.2	Write a Java program to print the sum (addition), multiply, subtract, divide and remainder of two numbers.
2	2.1	Write a Java program to accept a number and check the number is even or not. Prints 1 if the number is even or 0 if the number is odd.
	2.2	Write a Java program that accepts three integers from the user and return true if the second number is greater than first number and third number is greater than second number. If "abc" is true second number does not need to be greater than first number.
3	3.1	Write a Java program to find the maximum occurring character in a string
	3.2	Write a Java program to find first non repeating character in a string.
	3.3	Write a program in java to demonstrate method overloading
4	4.1	Write a program in java to demonstrate multilevel inheritance in java.
	4.2	Write a java program to create an abstract class named Shape that contains two integers and an empty method named print Area (). Provide three classes named Rectangle, Triangle and Circle such that each one of the classes extends the class Shape. Each one of the classes contains only the method print Area () that prints the area of the given shape.
5	5.1	Write a program that creates a user interface to perform integer division. The user enters two numbers in the text fields, Num1 and Num2. The division of Num1 and Num2 is displayed in the Result field when the Divide button is clicked. If Num1 and Num2 were not integers, the program would throw a Number Format Exception. If Num2 were zero, the program would throw an Arithmetic Exception Display the exception in a message dialog box.
	5.2	Write a java program that implements a multi-thread application that has three threads. First hread generates random integer every 1 second and if the value is even, second thread computes the square of the number and prints. If the value is odd, the third thread will print the value of cube of the number

### Syllabus: MCL114, OPERATING SYSTEMS SING LINUX LAB

<b>School: SET</b>		<b>Batch: 2020-2021</b>	
<b>Program: MSc</b>		<b>Current Academic Year: 2020-2020</b>	
<b>Branch:</b>		<b>Semester:</b>	
1	Course Code	MCL 114	
2	Course Title	Operating Systems sing Linux Lab	
3	Credits	1	
4	Contact Hours (L-T-P)	0-0-2	
	Course Status	Compulsory	
5	Course Objective	<ul style="list-style-type: none"> <li>• This course introduces the challenges for designing the operating systems.</li> <li>• Includes different design principles and algorithms.</li> <li>• Evaluation of algorithms proposed.</li> <li>• Implementation of algorithms and utilities.</li> </ul>	
6	Course Outcomes	<p>By the end of this course you will be able to:</p> <p>CO1: Understanding the structure of different operating systems &amp; System Calls.</p> <p>CO2: Applying CPU Scheduling Algorithms &amp; Various Memory Management Schemes.</p> <p>CO3: Applying Various Deadlock Detection &amp; Avoidance Techniques.</p> <p>CO4: Implementing Various Classical Concurrency &amp; Synchronization techniques.</p> <p>CO 5: Implement the memory based allocation</p> <p>CO 6:-Apply page replacement algorithm</p>	
7	Course Description	This course introduces the design principles of operating systems, resource management, identifying challenges and applying respective algorithms.	
8	Outline syllabus		CO Mapping
	<b>Unit 1</b>	<b>Practical based operating systems.</b>	<b>CO1</b>
		<p><b>P1.</b> Write programs using the following system calls of LINUX operating system: fork, exec, getpid, exit, wait, close, stat, opendir, readdir.</p> <p><b>P2.</b> Write programs using the I/O system calls of LINUX operating system (open, read, write, etc)</p> <p><b>P3.</b> Write C programs to simulate LINUX commands like ls, grep, etc.</p>	
	<b>Unit 2</b>	<b>Practical based on System Calls.</b>	<b>CO1</b>
		<p><b>P4.</b> Write a program to create processes and threads.</p> <p><b>P5.</b> Write a program solving the Producer-Consumer problem using semaphores.</p>	

		<b>P6.</b> Write a program to implement the solution for dining philosopher's problem.			
	<b>Unit 3</b>	<b>Practical based scheduling.</b>			<b>CO2</b>
		<b>P7.</b> Write a program to develop an application using I process communication using shared Memory. <b>P8.</b> Write a program to implement process scheduling mechanisms using FCFS & SJF. <b>P9.</b> Write a program to implement process scheduling mechanisms using Priority & round-robin scheduling.			
	<b>Unit 4</b>	<b>Practical based on Memory Allocation.</b>			<b>CO2, CO3, CO5</b>
		<b>P10.</b> Write a program to implement the banker's algorithm. <b>P11.</b> Write a program to implement memory allocation using first fit algorithm. <b>P12.</b> Write a program to implement memory allocation using best fit algorithm. <b>P13.</b> Write a program to implement memory allocation using worst fit algorithm.			
	<b>Unit 5</b>	<b>Practical based on Page replacement.</b>			<b>CO4, CO6</b>
		<b>P14.</b> Write a program to implement the page replacement algorithms.

Branch:			
1	Course Code	MCL115	
2	Course Title	Computer Networks Lab	
3	Credits	1	
4	Contact Hours (L-T-P)	0-0-2	
	Course Status	Compulsory/Elective	
5	Course Objective	To Provide students with an overview of networking and Gain insight into the issues, challenges and work at all level of reference models	
6	Course Outcomes	Students will be able to: CO1: Explain the basic concepts of computer network. CO2: Illustrate and differentiate working of all layers of the OSI Reference Model and TCP/IP model CO3: Analyze fundamental issues driving network design including error control, IP addressing, access control, flow and congestion control CO4: Compare working of various routing algorithms CO5: Test various network security algorithms CO6: Examine various cryptographic Algorithms	
7	Course Description	To familiarize with the basic taxonomy and terminology of computer networking area.	
8	Outline syllabus		CO Mapping
	Unit 1	Introduction	
	A	Study of Data Communication and Networking. Identify five components of Data communication system.	CO1, CO2
	B	Study of computer network topology and OSI model layered architecture.	CO1, CO2
	C	Study of basic networking commands: IPCONFIG, PING / Tracer and Net stat utilities to debug the network issues.	CO1, CO2
	Unit 2	Data Link Layer	
	A	To connect the computers in Local Area Network	CO1, CO2

	B	Write a C program to implement Character Stuffing and Destuffing	CO1, CO2
	C	Write a C program to Error Detection using Cyclic Redundancy Check Algorithms.	CO1, CO2
	Unit 3	Network Layer	
	A	Write a C program to determine if the IP address is in Class A, B, C, D, or E.	CO1,CO3
	B	Write a C program to translate dotted decimal IP address into 32-bit address.	CO1,CO3
	Unit 4	Transport Layer	
	A	Write a program for congestion control using Leaky bucket algorithm.	CO1,CO4
	B	Write a program for congestion control using Token bucket algorithm.	CO1,CO4,CO5
	C	Creating a Network topology using CISCO packet tracer software	CO1,CO4,CO5
	Unit 5	Application Layer	
	A	Write a program to implement DES for encryption.	CO1,CO5
	B	Write a Program to implement RSA	CO1,CO5,CO6
	C	Open Ended Project	CO1,CO5,CO6

## Syllabus: MCT111 Database Management Systems

<b>School: SET</b>		<b>Batch : 2020</b>	
<b>Program: M.Sc.</b>		<b>Current Academic Year: 2020-2020</b>	
<b>Branch: CSE</b>		<b>Semester: 3</b>	
1	Course Code	MCT 111	Course Name: Database Management Systems
2	Course Title	Database Management Systems	
3	Credits	3	
4	Contact Hours (L-T-P)	3-0-0	
	Course Status		
5	Course Objective	1.Develop the ability to design & implement and manipulate databases. 2.Understand the importance of Normalization 3.Introduce various Protocols & schemes used in DBMS 4.Apply DBMS concepts to various examples and real life applications.	
6	Course Outcomes	Students will be able to: <b>CO1.</b> Extend the knowledge & concepts of Database models. <b>CO2.</b> Apply normalization techniques to reduce redundancy from the database. <b>CO3.</b> Appraise the basic issues of Transaction processing & deadlock. <b>CO4.</b> Identify the importance of concurrency control & Granularity <b>CO5.</b> Explain the concept of Recovery & Distributed System. <b>CO6.</b> Design & develop database for real life problems.	
7	Course Description	This course introduces database design and creation using a DBMS product. Emphasis is on, normalization, data integrity, data modeling, and creation of simple tables, queries, reports, and forms. Upon completion, students should be able to design and implement normalized database structures by creating simple database tables, queries, reports, and forms.	
8	Outline syllabus		CO Mapping
	<b>Unit 1</b>	<b>Introduction to Databases &amp; Data Models:</b>	
	A	Concept & Overview of DBMS, Data Models, Database languages, Database Administrator, Database Users.	<b>CO1</b>
	B	Architecture of DBMS, Data Models, Data Modeling using Entity Relationship Model.	
	C	Various Relational data model concepts, Unary Relational Operations	
	<b>Unit 2</b>	<b>Normalization in Design of Databases:</b>	
	A	Functional Dependency, Different anomalies in designing a Database, Normalization first	
	B	Second and Third normal forms, Boyce Codd normal	

		form,	<b>CO1, CO2</b>	
C		Multi valued dependency, Fourth normal forms, Inclusion dependencies, loss less join decompositions		
	<b>Unit 3</b>	<b>Transaction Management and Deadlock</b>		
A		Transaction processing system, schedule and recoverability,		<b>CO3</b>
B		Testing of serializability, Serializability of schedules conflict & view serializable schedule		
C		DeadLock Phases : Avoidance ,Detection ,		
	<b>Unit 4</b>	<b>Concurrency Control:</b>		
A		Concurrency Control: Locking Techniques for concurrency control,		<b>CO3, CO4</b>
B		time stamping protocols for concurrency control, multiversion schemes		
C		Granularity of Data Items and Multiple Granularity Locking		
	<b>Unit 5</b>	<b>Recovery &amp; Distributed System</b>		
A		Failure Classification , Recovery and Atomicity , Buffer Management		<b>CO5</b>
B		Failure with Loss of Nonvolatile Storage Recovery Algorithm		
C		Distributed Database Concepts database, Distributed Databases Types & Architectures		
	Mode of examination	Theory		
	Weightage Distribution	CA	MTE	ETE

<b>School:SET</b>		<b>Batch : 2020</b>	
<b>Program: MSc</b>		<b>Current Academic Year: 2020-20</b>	
<b>Branch:</b>		<b>Semester: II</b>	
1	Course Code	MCT112	Course Name: Object oriented programming with JAVA
2	Course Title	Object Oriented Programming with Java	
3	Credits	3	
4	Contact Hours (L-T-P)	3-0-0	
	Course Status	PG	
5	Course Objective	To learn Java language syntax and semantics and concepts such as classes, objects, inheritance , polymorphism, packages and multithreading .	
6	Course Outcomes	CO1. Define Object oriented programming concepts by identifying classes, objects, members of a class and relationships among them needed for a specific problem. CO2: Illustrate different features of java. CO3: Develop Java programs to solve problems of applications using OOP principles such as abstraction, polymorphism and inheritance. CO4: Categorize runtime errors thrown in the application software or generated runtime by applying the methods of exception handling and File I/O CO5. Explain the concept of multithreading. CO6. Design real life application using Java.	
7	Course Description	Basic <i>Object Oriented Programming (OOP)</i> concepts including objects, <i>classes</i> , methods, parameter passing, information hiding, inheritance and polymorphism are discussed.	
8	Outline syllabus	CO Mapping	
	<b>Unit 1</b>	<b>Object Oriented Programming Concepts</b>	
	A	Introduction to OOP, Characteristics of OOP, Difference between OOP and procedural languages, Features of Java	CO1, CO2
	B	Platform independency of Java, Architecture of JDK, JRE and JVM. memory allocation and garbage collection to Java Programs.	CO1, CO2
	C	Introduction to IDE for java development, Writing first program in Java and program execution steps. Features of Java	CO1, CO2
	<b>Unit 2</b>	<b>Introduction to Java</b>	
	A	Java Programming Fundamentals: declaring variables	CO1,CO2

		and Constants, Java data Types and size of each type, arithmetic, logical and bitwise Operators in java,	
B		Control statements : if ..else, switch.. case, Loop control : for loop, while loop, do.. while loop, break and continue, nesting of decision and loop control.	CO1, CO2
C		Passing arguments from commandline, Arrays in Java, Type conversion, promotion rules in expressions.	CO1, CO2
<b>Unit 3</b>		<b>Class , object and constructor</b>	
A		Defining Classes , class members, declaration of Objects, taking Input from users	CO1,CO2
B		Methods, Method overloading, Constructors, Constructors overloading	CO1,CO2,CO3
C		static keyword, Static methods, Static members. Reason of making main function static, Strings, string handling	CO2
<b>Unit 4</b>		<b>Inheritance, package and Interface Inheritance Implementation</b>	
A		Inheritance Implementation: Types of Inheritance, Multilevel Hierarchy, Overriding methods, Polymorphism, use of this and super, Constructor call in inheritance	CO2,CO3,CO6
B		Abstract class and method, Final class, method and variable, Implementing Interface, Concept of multiple inheritance in Java, Wrapper class,	CO2,CO3,CO6
C		Packages: User defined packages, built-in packages (java.langpackage), Access modifiers	CO2,CO3,CO6
<b>Unit 5</b>		<b>I/O, Exception and Multithreading</b>	
A		Input/output: Exploring java.io, File, Stream Classes Byte Stream Classes and Character stream Classes, Reading and writing in file	CO4,CO6
B		Introduction to Exception Handling, Introduction to try, catch, Finally , throw and throws, Checked and Unchecked exceptions, User define exception	CO4,CO6
C		Introduction to Multithreading: multithreading advantages and issues, Creating thread using Runnable interface and Thread class, Thread life cycle, Thread priorities, sleep method.	CO5,CO6

4	Contact Hours (L-T-P)	3-0-0	
	Course Status	Elective	
5	Course Objective	Enable learner to understand, explore, and acquire a critical understanding Cyber Law. Give learners in depth knowledge of Information Technology Act and legal frame work of Right to Privacy, Data Security, Data Protection and tools	
6	Course Outcomes	<p>On successful completion of this module students will be able to</p> <p>CO1: Develop competencies for dealing with frauds and deceptions (confidence tricks, scams) and other cybercrimes for example, child pornography etc. that are taking place via the Internet</p> <p>CO2: Explore the legal and policy developments in various countries to regulate Cyberspace</p> <p>CO3: Formulate various security measures for cyber-attacks.</p> <p>CO4: Apply the principles in real life situations.</p> <p>CO5: Identify various Cybercrimes and take necessary actions.</p> <p>CO6: Assess the various online activities.</p>	
7	Course Description	This course introduces aspects of cyber security, encompassing the principles, to analyze the data, identify the problems, and choose the relevant countermeasures to apply.	
8	Outline syllabus		CO Mapping
	<b>Unit 1</b>	Introduction to Cyber Security	
	A	Understanding Computers, Internet and Cyber Laws, information security legal liabilities,	CO1, CO2
	B	intellectual property, defamation, privacy concerns, censorship, cyber fraud, e – commerce law,	CO5, CO6, CO3
	C	insurance law, the clash of laws, cyber law dispute resolution, the law of linking, cyber crime	CO6, CO4, CO2
	<b>Unit 2</b>	Intellectual rights	
	A	Protection of Intellectual Property Rights in	CO1,CO2. CO3

		CyberSpace in India,			
B		Compensation and Adjudication of Violations of Provisions of It Act and Judicial Review, Some important Offences under the CyberSpace Law and the Internet in India,			CO4,CO5,CO6
C		Other Offences under the Information Technology Act in India			CO1,CO6, CO3, CO4
<b>Unit 3</b>		Role of Evidences and Rules			
A		The Role of Electronic Evidence and the Miscellaneous Provisions of the IT Act,			CO1,CO2, CO4
B		Legal Aspects of Electronic Records/Digital Signatures,			CO6, CO3,CO1
C		The Rules and Regulations of Certifying Authorities in India			CO3,CO4,CO6,CO5
<b>Unit 4</b>		Cyber Space Laws			
A		International Efforts Related to CyberSpace Laws,			CO1,CO2, CO6
B		Fundamental Jurisdiction Principles Under International Law, Classic U.S. Jurisdiction			CO2,CO4,CO6
C		Principles, Council of Europe convention on cyber crimes			CO1,CO3,CO5
<b>Unit 5</b>		Tools			
A		Cyber Check, TrueBack,			CO1,CO2, CO6
B		Hasher, EmailTracer			CO1.CO2,CO6,CO5
C		Pasco, Nmap, BinText			CO2,CO3,CO5
Mode of examination		Theory

## Syllabus of Application Programming in Python Lab MCL119

---

<b>School:</b>		<b>School of Engineering and technology</b>	
<b>Department</b>		<b>Department of Computer Science and Engineering</b>	
<b>Program:</b>		<b>M.SC</b>	
<b>Branch:</b>			
1	Course Code	MCL119	
2	Course Title	<b>Application Programming in Python Lab</b>	
3	Credits	1	
4	Contact Hours (L-T-P)	0-0-2	
	Course Status	Regular	
5	Course Objective	Emphasis is placed on procedural programming, algorithm design, and language constructs common to most high level languages and Email handling through Python Programming.	
6	Course Outcomes	Upon successful completion of this course, the student will be able to: CO1. Apply decision and repetition structures in program design. CO2. Demonstrate the use of Python lists, tuples and dictionaries CO3. Describe and apply object-oriented programming methodology. CO4. Implement methods and functions to improve readability of programs. CO5. Model bottom-up approach in programming in database CO6. Build Python programs to illustrate concise and efficient algorithms	
7	Course Description	Python is a language with a simple syntax, and a powerful set of libraries. It is widely used in many scientific areas for data exploration. This course is an introduction to the Python programming language for students without prior programming experience. We cover data types, control flow, object-oriented programming and Email handling	
8	Outline syllabus		CO Mapping
	<b>Unit 1</b>	<b>Practical based on conditional statements and control structures</b>	
		<ul style="list-style-type: none"> <li>Program to implement all conditional statements</li> <li>Program to implement different control structures</li> </ul>	CO1
	<b>Unit 2</b>	<b>Practical related to List, Tuples and Dictionaries</b>	
		<ul style="list-style-type: none"> <li>Program to implement operations on lists</li> <li>Program to implement operations on Dictionary</li> <li>Program to implement operations on Tuple</li> </ul>	CO1,CO2
	<b>Unit 3</b>	<b>Practical related to Object Oriented Programming</b>	
		Program to use object oriented concepts like inheritance, overloading polymorphism etc. Program for file handling	CO3

	<b>Unit 4</b>	<b>Practical related to Functions and Exception Handling</b>			
		<ul style="list-style-type: none"> <li>• Program to implement Exception Handling</li> <li>• Program to use different functions</li> </ul>			CO4
	<b>Unit 5</b>	<b>Practical related to Database</b>			
		<ul style="list-style-type: none"> <li>• Program to make connections with different databases</li> <li>• Program to access database</li> </ul>			CO5,CO6

## 2.1 Template A1: Syllabus for Theory Courses (SAMPLE)

<b>School:</b>		<b>School of Engineering and technology</b>		
<b>Department</b>		<b>Department of Computer Science and Engineering</b>		
<b>Program:</b>				
<b>Branch:</b>				
1	Course Code	MCT117		
2	Course Title	Android Application Development		
3	Credits	3		
4	Contact Hours (L-T-P)	3-0-0		
	Course Status	Core /Elective/Open Elective		
5	Course Objective	Android application development course is designed to help students to implement application for android devices. The student will learn the basics of android platform and understand application Lifecycle.		
6	Course Outcomes	CO1: Demonstrate and understanding anatomy of an android application. CO2: Develop various android applications related to layouts and rich uses interactive interfaces. CO3:Apply essential android programming concept CO4: Distinguish and compare different components of Android CO5: Access and work with databases under an android operating system. CO6: Develop Basic and advance android app development for android devices.		
7	Course Description	This android development course will help students to understand the basis of Android platform and its lifecycle. This will help them to implement simple GUI applications, use built-in components and work with database to store the data.		
8	Outline syllabus			CO Mapping
	<b>Unit 1</b>	<b>Introduction of Android</b>		
	A	History of Android, Features of Android, Android Devices, Open Handset Alliance (OHA) , Advantages of Android, Comparing Android with other platform		CO1
	B	Android Directory Structure, Android Development Tools, Architecture of Android.		CO1

	C	Structure of Manifest files, Activities, Activity life cycle		CO1
	<b>Unit 2</b>	<b>Android User Interfaces</b>		
	A	Layouts-Linear layout, Relative layout, Constraint layout		CO1,CO2
	B	Input Controls – Text input, Checkboxes, Radio buttons, Spinner, Toggle buttons and switches		CO1,CO2
	C	Event delegation model, Type of Event Listeners, Onclick, OnLongClick, onFocusChanged, OnKeyUp, OnKeyDown		CO1,CO2
	<b>Unit 3</b>	<b>Components of Android</b>		
	A	Intents, types of intents, Intent Filter, Sending and Receiving of data,		CO3
	B	Services, service life cycle, Broadcast receivers,		CO3
	C	Notifications , Type of notification,Toast notification		CO3
	<b>Unit 4</b>	<b>Working with SQL Lite</b>		
	A	Introduction to SQLite database, Steps for connecting application with database.		CO4,CO5
	B	Fetch and update data in database from application,		CO4,CO5
	C	Cursor and content value, opening and closing database		CO4,CO5
	<b>Unit 5</b>	<b>Sensors and Animation</b>		
	A	Sensor Manager, Sensor Framework, Detect availability of sensor , Fetch data from sensors on frequent basis		CO6
	B	Types of Sensors Accelerometer, Gyroscope, Proximity Sensor, Orientation, Light Sensor		CO6
	C	Graphics and Animation		CO6
	Mode of examination	Theory/Jury/Practical/Viva		
	Weightage Distribution	CA 30%	MTE 20%	ETE 50%

<b>School: SET</b>		<b>Batch : 2020-19</b>	
<b>Program:</b>		<b>Current Academic Year: 2020-19</b>	
<b>Branch: CSE</b>		<b>Semester: Vth   QAB</b>	
1	Course Code	<b>ARP 301</b>	Course Name : <b>Quantitative Aptitude Behavioural and Interpersonal Skills</b>
2	Course Title	<b>Quantitative Aptitude Behavioural and Interpersonal Skills</b>	
3	Credits	2	
4	Contact Hours (L-T-P)	0-0-4	
Course Status			
5	Course Objective	<p>To enhance holistic development of students and improve their employability skills. Provide a 360 degree exposure to learning elements of Business English readiness program, behavioural traits, achieve softer communication levels and a positive self-branding along with augmenting numerical and altitudinal abilities. To up skill and upgrade students' across varied industry needs to enhance employability skills. By the end of this semester, a will have entered the threshold of his/her 3<sup>rd</sup> phase of employability enhancement and skill building activity exercise.</p>	
6	Course Outcomes	<p>CO1: <i>A student will understand &amp; apply Personality and its traits   The art of impression management. A Student will learn Personality development which will help a student groom to meet the needed social strata for establishing himself/herself in the society, make a meaningful personality and find employment</i></p> <p>CO2: <i>At the end of the program Behavioural and Interpersonal Skills curriculum will help a student assert a positive behavioural attitude and attributes developing interpersonal skills for building positive and meaningful social and professional relationships</i></p> <p>CO3: <i>At the end of the program a student will learn the art of avoiding Arguments and learn to build meaningful conversations that will help them become effective speakers and conversation makers helping them succeed in social and professional life  The Art of Assertiveness will help them to become assertive communicators and not aggressive ones for the same end result</i></p> <p>CO4: <i>At the end of the program the Constructive Criticism syllabus will let a student criticize for positive emphasis for improvement, growth and eliminating wasteful synergies that deter holistic development</i></p> <p>CO5: <i>At the end of the program The 4M Model   Verbal Abilities-3 syllabi will teach the students basics of leadership in coaching and mentoring models that will help them become effective leaders and coaches</i></p> <p>CO6: <i>At the end of the program the Level 3 of Quant , Aptitude and Reasoning abilities will help students build enhanced reasoning and aptitudinal abilities</i></p>	
7	Course Description	<p>This bundles Training approach attempts to explore the personality, character, and the natural style of the student. This helps to develop character, personality, confidence and interpersonal abilities within the student along with level 3 readiness in quant, aptitude and reasoning skills</p>	
8	Outline syllabus – ARP301		
	<b>Unit 1</b>	<b>Impress to Impact</b>	<b>CO MAPPING</b>
	A	What is Personality?  Creating a positive impression – The 3 V's of Impression   Individual Differences and Personalities	CO1
	B	Personality Development and Transformation   Building Self Confidence	CO2

		<b>Behavioural and Interpersonal Skills</b>	
	<b>C</b>	Avoiding Arguments   The Art of Assertiveness   Constructive Criticism   The Personal Effectiveness Grid   Assessing our Strengths & Limitations and Creating an Action Plan for Learning with the 4M Model   Verbal Abilities-3	CO5, CO4, CO3
	<b>Unit 2</b>	<b>Introduction to APTITUDE TRAINING- Reasoning- Logical/ Analytical</b>	
	<b>A</b>	Numbers & Digits , Mathematical Operations   Analytical Reasoning	CO6
	<b>B</b>	Cubes & Cuboids   Statement & Assumptions	CO6
	<b>C</b>	Strong & Weak Argument	CO6
	<b>Unit 3</b>	<b>Quantitative Aptitude</b>	
	<b>A</b>	Work & Time ,Pipes & Cistern	CO6
	<b>B</b>	Time ,Speed & Distance, Quadratic & Linear Equations, Logs & Inequalities	CO6
	<b>C</b>	Sequence & Series, Logarithms, Data Interpretation   Data sufficiency - Level 1	CO6

<b>School: SET</b>		<b>Batch : 2020</b>	
<b>Program: MCA</b>		<b>Current Academic Year: 2020-20</b>	
<b>Branch:</b>		<b>Semester: IV</b>	
1	Course Code	MCA271	Course Name: MCA
2	Course Title	<b>Cloud Computing</b>	
3	Credits	3	
4	Contact Hours (L-T-P)	3-0-0	
	Course Status	Elective	
5	Course Objective	<ol style="list-style-type: none"> <li>1. Provide students with an overview of the fundamental concepts of Cloud Computing.</li> <li>2. Gain insight into the challenges and limitations Models of cloud computing.</li> <li>3. To learn the various technologies of the cloud computing paradigm and learn about recent advances in Cloud Computing and enabling technologies.</li> <li>4. Prepare students for research in the area of cloud Computing risks and cloud security challenges.</li> <li>5. Enhance students communication and problem solving skills</li> </ol>	
6	Course Outcomes	<p>At the end of the course, students will have achieved the following learning objectives.</p> <p>CO 1. Define the basics of cloud and recall the computer Science concepts which are helpful in understanding on demand service architecture.</p> <p>CO 2. Classify and describe the architecture and taxonomy of parallel and distributed computing, including shared and distributed memory, and data and task parallel computing.</p> <p>CO 3. Apply and Manage Virtualization and Workflow to use the cloud in file systems and applications.</p> <p>CO 4. Categorize and Characterize between Infrastructure services, deployment models, and governance in cloud computing. Examine the design of task and data parallel distributed algorithms for Clouds and use them to construct Cloud applications.</p> <p>CO 5. Evaluate the importance of cloud using monitoring and management of services for performance improvement of HPC and to follow the Governance and Compliances.</p> <p>CO 6. Elaborate the design concept and formulate to build the solution using cloud service providers as AWS, MS Azure and Google Cloud. Demonstrate the use of Map-Reduce, Vertex-Centric and Continuous Dataflow programming models.</p>	
7	Course Description	This course introduces advanced aspects of Cloud Computing, encompassing the principles, to analyze the cloud, identify the problems, and choose the relevant models and algorithms to apply.	
8	Outline syllabus		CO Mapping
	<b>Unit 1</b>	<b>Cloud Computing Fundamentals</b>	
		<ol style="list-style-type: none"> <li>A. Types of Computing, Grid computing, distributed computing, Client-server computing, Introduction to distributed systems,</li> <li>B. Cloud Computing definition, Roots of Cloud Computing, Layers and Types of Clouds, Desired Features of a Cloud, Cloud Infrastructure Management, Understanding Services: SaaS, PaaS, IaaS</li> <li>C. Infrastructure as a Service Providers, Platform as a Service Providers, Challenges and Risks, Broad Approaches to Migrating into the Cloud, The Seven-Step Model of Migration into a Cloud</li> </ol>	CO1, CO2, CO3
	<b>Unit 2</b>	<b>Understanding Abstraction and Virtualization</b>	
		A. Introduction to Virtual Machines, The Anatomy of Cloud	CO1, CO2, CO3

		<p>Infrastructures, VM Provisioning and Manageability, Virtual Machine Migration Services, VMware, vSphere</p> <p>B. Management of Virtual Machines for Cloud Infrastructures, Understanding Machine Imaging, Distributed Management of Virtual Infrastructures, Scheduling Techniques</p> <p>C. The Logical Design, Secure Distributed Data Storage in Cloud Computing, Cloud Storage, Google file system, Technologies for Data Security in Cloud Storage</p>	
	<b>Unit 3</b>	<b>Cloud Computing Services and Applications</b>	
	A	<p>A. Introduction of CometCloud, Aneka and CloudSim, Integration of Private and Public Clouds, Technologies and Tools for Cloud Computing,</p> <p>B. Introduction of Enterprises Demand and Cloud Computing, Dynamic ICT Services, Workflow Engine for Clouds, Workflow Management Systems, Architecture of Workflow Management Systems</p> <p>C. Scientific Application for Cloud Environments, Classification of Scientific Applications and Services in the Cloud, MapReduce Programming Model, MapReduce Impacts and Research Directions.</p>	CO2,CO3,CO4
	<b>Unit 4</b>	<b>Cloud Computing Risk and Performance Issues</b>	
	A	<p>A. Model for Federated Cloud Computing, Security Considerations, SLA Management in Cloud Computing: A Service Provider's Perspective, Types of SLA, Life Cycle of SLA,</p> <p>B. HPC in the Cloud: Performance-related Issues, Game Hosting on Cloud Resources, Building Content Delivery Networks Using Clouds, Resource Cloud Mashups</p> <p>C. Legal Issues in Cloud Computing(PCI DSS), Data Privacy and Security Issues, The CIA Triad: Confidentiality, Integrity, And Availability, Common Threats and Vulnerability in cloud, Cloud Service Provider (CSP) Risks</p>	CO3, CO4,CO5
	<b>Unit 5</b>	<b>AWS, MS Azure and Google Cloud Services</b>	
	A	<p>A. AWS Services:Elastic Compute Cloud, Identity and Access Management, Simple Storage Service, Content Delivery Network, CloudWatch</p> <p>B. MS Azure Services:Azure Virtual Machine, SQL Server on Virtual Machines, Azure SQL Database,Azure Active Directory</p> <p>C. ## Syllabus: MCA 365 SOFTWARE PROJECT MANAGEMENT

<b>School:</b>		<b>School of Engineering and technology</b>	
<b>Department</b>		<b>Department of Computer Science and Engineering</b>	
<b>Program:</b>		<b>MCA</b>	
<b>Branch:</b>		<b>NA</b>	
1	Course Code	MCA 365	Semester-V
2	Course Title	<b>Software Project Management</b>	
3	Credits	3	
4	Contact Hours (L-T-P)	3-0-0	
	Course Status	NON Elective	
5	Course Objective	To provide fundamental skills of software Project management emphasizing on issues & hurdles associated with delivering successful projects. Apply project management concepts through working in a group as team leader or active team member on an IT project.	
6	Course Outcomes	After successful completion of this course students should be able to: CO1: Define the principles of project management for developing software. CO2: Explain various project management scheduling techniques. CO3: Apply different techniques of project monitoring, control and review. CO4: Classify various project management tools and estimate the risks involved in project activities. CO5: Assess issues related to project quality and staffing. CO6: Discuss the effect of project management practices in an organization	
7	Course Description	This course is aimed at introducing the primary important concepts of project management related to managing software development projects. Students will also get familiar with the different activities involved in Software Project Management. Further, they will also come to know how to successfully plan and implement a software project management activity, and to complete a specific project in time with the available budget.	
8	Outline syllabus		CO Mapping
	<b>Unit 1</b>	<b>Introduction to Software Project Planning</b>	
	A	Fundamentals of Software Project Management (SPM), Need Identification, Vision and Scope Document, Project Management Cycle, SPM Objectives	CO1
	B	SPM Framework, Software Project Planning, Planning Objectives, Project Plan, Types of Project Plan, Structure of a Software Project Management Plan	CO1
	C	Software Project Estimation, Estimation Methods, Estimation Models, Decision Process	CO1
	<b>Unit 2</b>	<b>Project Organization and Scheduling Project Elements</b>	
	A	Work Breakdown Structure (WBS), Types of WBS, Functions, Activities and Tasks, Project Life Cycle and Product Life Cycle	CO2

	B	Ways to Organize Personnel, Project Schedule, Scheduling Objectives, Building the Project Schedule, Scheduling Terminology and Techniques	CO2	
	C	Network Diagrams: PERT, CPM, Bar Charts: Milestone Charts, Gantt Charts	CO2	
	<b>Unit 3</b>	<b>Project Monitoring and Control</b>		
	A	Dimensions of Project Monitoring & Control, Earned Value Analysis	CO3, CO6	
	B	Earned Value Indicators: Budgeted Cost for Work Scheduled (BCWS), Cost Variance (CV), Schedule Variance (SV), Cost Performance Index (CPI), Schedule Performance Index (SPI)	CO3	
	C	Software Reviews, Types of Review: Inspections, Deskchecks, Walkthroughs, Code Reviews	CO3	
	<b>Unit 4</b>	<b>Software Configuration and Risk Management</b>		
	A	Software Configuration Items and Tasks, Baselines, Plan for Change, Change Control, Change Requests Management, Version Control	CO4	
	B	Risk Management: Risks and Risk Types, Risk Breakdown Structure (RBS), Risk Management Process: Risk Identification, Risk Analysis, Risk Planning, Risk Monitoring	CO4, CO6	
	C	Cost Benefit Analysis, Software Project Management Tools: CASE Tools, MS-Project	CO4, CO6	
	<b>Unit 5</b>	<b>Software Quality Assurance</b>		
	A	Concept of Software Quality, Software Quality Attributes, Software Quality Metrics and Indicators, The SEI Capability Maturity Model (CMM)	CO5, CO6	
	B	SQA Activities, Formal SQA Approaches: Proof of Correctness, Statistical Quality Assurance, Product versus process quality management,	CO5	
	C	Introduction, types of contract, stages in contract, placement, typical terms of a contract, contract management, acceptance	CO5, CO6

## Computer Graphics and Animation Lab

<b>School: SET</b>		<b>Batch : 2020 onwards</b>	
<b>Program: MCA</b>		<b>Current Academic Year:</b>	
<b>Branch: CSE</b>		<b>Semester:</b>	
<b>1</b>	<b>Course Code</b>	MCP270	
<b>2</b>	<b>Course Title</b>	<b>Computer Graphics and Animation Lab</b>	
<b>3</b>	<b>Credits</b>	<b>1</b>	
<b>4</b>	<b>Contact Hours (L-T-P)</b>	<b>0-0-2</b>	
	<b>Course Status</b>	<b>core</b>	
5	Course Objective	The main objective of this course is to acquaint students with the practical applicability of computer graphics and animation. They should be able to perform 2D -3D graphics with lines, curves and can implement algorithms to rasterizing simple shapes, fill and clip polygons and have a basic grasp of transformation techniques. It also include problems to develop storyboards and 2-dimentional animation including creating, importing and sequencing media elements.	
6	Course Outcomes	Students will be able to have thorough Understanding of:  <b>CO1: Examine</b> the need of developing graphics application. <b>CO2: Build</b> algorithmic development of graphics primitives like: line, circle, polygon etc. <b>CO3: Develop</b> programs for representation and transformation of graphical images and pictures. <b>CO4: Apply</b> basic transformations on objects <b>CO5: Demonstrate</b> progress in basic drawing and animation skills <b>CO6: Create</b> accurate and aesthically appealing basic animation	
7	Course Description	This course introduces practical applicability of interactive computer graphics and drawing algorithms. Along with fundamental skills to produce traditional style animation as well as knowledge of the principles of animation.	
8	Outline syllabus		CO Mapping
	1	Write a program to draw a line using DDA algorithm	CO1, CO2
	2	Write a program to draw a line using Bresenham's algorithm.	CO1, CO2
	3	Write a program to draw a circle using midpoint algorithm.	CO1, CO2, CO3
	4	Write a program to draw a circle using Bresenham's algorithm.	CO1, CO2, CO3
	5	Write a program to draw a rectangle using line drawing algorithm.	CO1, CO2, CO3
	6	Write a program to perform 2D Transformation on a line.	CO3, CO4
	7	Write a program to perform shear transformation on a rectangle.	CO3, CO4
	8	Write a program to rotate a circle (alternatively inside and outside) around the circumference of another circle.	CO3, CO4

9	Write a program to draw a car using in build graphics function and translate it from bottom left corner to right bottom corner of screen.			CO3, CO4
10	Write a program to draw balloons using in build graphics function and translate it from bottom left corner to right top corner of screen.			CO3, CO4
11	Write a program to implement line clipping (Cohen Sutherland algorithm).			CO3, CO4, CO5
12	Write a program for making Bezier curve			CO3, CO4, CO5
13	Write a program to study various in built functions for 2D drawing in MAYA software.			CO5, CO6
14	Write a program to show animation of a ball moving in a helical path			CO5, CO6
15	Write a program to show animation of solar system.			CO5, CO6

### CO and PO Mapping

S. No.	Course Outcome	Program Outcomes (PO) & Program Specific Outcomes (PSO)
1.	CO1: Examine the need of developing graphics application.	PO1, PO2, PO3, PO4, PO7, PO9, PO10, PSO1, PSO2
2.	CO2: Build algorithmic development of graphics primitives like: line, circle, polygon etc.	PO1, PO2, PO3, PO4, PO10, PSO1, PSO2
3.	CO3: Develop programs for representation and transformation of graphical images and pictures.	PO1, PO2, PO3, PO4, PO5, PO8, PO10, PSO1, PSO2
4.	CO4: Apply basic transformations on objects	PO1, PO2, PO3, PO4, PO6, PO10, PSO1, PSO2
5	CO5: Demonstrate progress in basic drawing and animation skills	PO1, PO2, PO3, PO4, PO5, PO6, PO10, PSO1, PSO2
6	CO6: Create accurate and aesthically appealing basic animation	PO1, PO2, PO3, PO4, PO5, PO6, PO8, PO9, PO10, PSO1, PSO2

<b>Program: MCA</b>		<b>Current Academic Year: 2020-2020</b>	
<b>Branch: MCA</b>		<b>Semester: VIth Sem</b>	
1	Course Code	<b>MCP301</b>	Course Name: Mini Project (MCA)
2	Course Title	Mini Project (MCA)	
3	Credits	1	
4	Contact Hours (L-T-P)	0-0-2	
	Course Status	Compulsory	
5	Course Objective	The objective of this course is to let the students apply the programming knowledge into a real- world situation/problem.	
6	Course Outcomes	Students will able to: CO1: Analyze a given problem; define its requirements and specifications appropriate to its solution. CO2: Apply prior knowledge to designing and implementing solutions to problems using advanced programming techniques. CO3: Analyze and make use of modern tools and packages in efficient manner./ reuse- or integrate with- existing components CO4: Apply techniques of software verification and validation of project successfully. CO5: Deduce and conclude effective time and project management techniques. CO6: Effectively elaborate and communicate the project work in written and oral forms using appropriate different visualization tools and evaluation metrics.	
7	Course Description	This course will consist of the work on the topic selected for the minor project .The project must be done in a group not exceeding four students. The candidate is expected to select the project, do the requirements analysis, and carry out the necessary design procedure.	
8	Outline syllabus		CO Mapping
	<b>Unit 1</b>	Problem Definition, Team/Group formation and Project Assignment. Finalizing the problem statement, resource requirement, if any	CO1,CO6
	<b>Unit 2</b>	Develop a work flow or block diagram for the proposed system / software, Design algorithms for the proposed problem.	CO2
	<b>Unit 3</b>	Implementation of work under the guidance of a faculty member and obtain the appropriate results.	CO3,CO6,
	<b>Unit 4</b>	Demonstrate and execute Project with the team. Test the project modules.	CO4,CO6
	<b>Unit 5</b>	Report should include Abstract, Hardware / Software Requirement, Problem Statement, Design/Algorithm, Implementation Detail & Test Reports. References if any.	CO5,CO6

	The presentation, report, work done during the term supported by the documentation, forms the basis of assessment.

## Syllabus: MCT211 Data Mining and Knowledge Discovery

<b>School: SET</b>		<b>Batch : 2020</b>	
<b>Program: MCA</b>		<b>Current Academic Year: 2020-20</b>	
<b>Branch: CSE</b>		<b>Semester:</b>	
1	Course Code	MCT211	Course Name: <b>Data Mining and Knowledge Discovery</b>
2	Course Title	<b>Data Mining and Knowledge Discovery</b>	
3	Credits	3	
4	Contact Hours (L-T-P)	3-0-0	
	Course Status	Elective	
5	Course Objective	<ol style="list-style-type: none"> <li>1. Provide students with an overview of the methodologies and approaches to data mining</li> <li>2. Gain insight into the challenges and limitations of different data mining techniques</li> <li>3. Provide the students with practice on applying data mining solutions</li> <li>4. Prepare students for research in the area of data mining and related applications</li> <li>5. Enhance students communication and problem solving skills</li> </ol>	
6	Course Outcomes	Students will be able to: CO1: To understand the basic concept of datamining CO2: Demonstrate the Data Pre processing & transformation Techniques CO3: Explain Various Pattern Mining Methodology CO4: Compare & Contrast Classification & Prediction Mechanism CO5: Experiment with Clustering Algorithms CO6: Apply Data mining Techniques in real world Knowledge Discovery	
7	Course Description	This course introduces advanced aspects of data warehousing and data mining, encompassing the principles, to analyze the data, identify the problems, and choose the relevant models and algorithms to apply.	
8	Outline syllabus		CO Mapping
	<b>Unit 1</b>	<b>Introduction</b>	
	A	Evolution of Data mining and introductory concepts,	CO1
	B	Knowledge Discovery Process,	
	C	Introduction to outlier.	
	<b>Unit 2</b>	<b>Data Pre processing</b>	
	A	Descriptive Data Summarization, Data Cleaning,	CO1, CO2, CO6
	B	Integration and Transformation,	
	C	Data Reduction, Discretization and Concept Hierarchy Generation.	
	<b>Unit 3</b>	<b>Frequent Pattern Mining</b>	
	A	Efficient and Scalable Frequent Itemset Mining Methods: Apriori	CO3, CO6
	B	FPGrowth, ECLATS	

	C	correlation Analysis.		
	<b>Unit 4</b>	<b>Classification&amp; Prediction</b>		
	A	What is classification, requirements of classification, Decision Tree-ID3Algorithm, ,		
	B	Naive Bayes Classifier, Rule Based classification, Backpropogation		
	C	Support Vector Machine for linearly separable data. Prediction: - Linear Regression.		
	<b>Unit 5</b>	<b>Clustering</b>		
	A	What is cluster analysis, requirements of cluster analysis,		
	B	Partitioning methods-k-means and k-mediods,		
	C	Hierarchical Methods-Agglomerative and divisive, Density based methods- DBSCAN		
	Mode of examination	Theory

2	Course Title	<b>Mobile Technologies</b>	
3	Credits	3	
4	Contact Hours (L-T-P)	3-0-0	
	Course Status	Elective	
5	Course Objective	The objective of the course is to impart knowledge of mobile and wireless computing systems and techniques.	
6	Course Outcomes	On successful completion of this module students will be able to <b>CO1:</b> Synthesize the basic concepts and principles in mobile computing. <b>CO2:</b> Analyze the concept of wireless and their communication. <b>CO3:</b> Synthesize the structure and components for mobile IP and mobility Management.	
7	Course Description	This course introduces advanced aspects of mobile generation & cellular system. Also impart knowledge of Satellite broadcast system & routing algorithms based on wireless network.	
8	Outline syllabus		CO Mapping
	<b>Unit 1</b>	<b>Introduction</b>	
	A	Issues, challenges, and benefits, Mobile radio communication fundamentals, overview of mobile generation 1G,2G,3G,4G and 5G	CO1
	B	Fundamental of wireless communication, bandwidth concept, type of signals, path loss, modulation: shift key modulation, Spread spectrum modulation, MAC issue	CO1,CO2
	C	Multiple Access: FDMA, TDMA, CSMA/CD, SDMA, CDMA	CO1,CO2
	<b>Unit 2</b>	<b>Cellular System</b>	
	A	Cell concepts, frequency and channel allocation, frequency reuse concepts: sectorization and clustering, Handoff	CO1,CO2
	B	Global System for Mobile Communication (GSM) System Overview: GSM Architecture, channels, Mobility Management, localization and calling	CO1,CO2,CO3
	C	General Packet Radio Service (GPRS): GPRS Architecture, GPRS network nodes, EDGE, 3G and 4G, Cognitive Radio Network (5G)	CO1,CO2
	<b>Unit 3</b>	<b>Satellite &amp; Broadcast System</b>	
	A	Basics concepts of satellite and Applications, types of satellite	CO1
	B	Cyclical repetition of data, Digital audio/ video broadcasting, Broadcasting convergence and mobile communication	CO1,CO2
	C	HD radio, working of DTH (Direct To Home)	CO2

	<b>Unit 4</b>	<b>Wireless network &amp; Routing Algorithm</b>			
	A	Mobile IP, DHCP, Mobile Adhoc Network, Hidden and exposed terminal problems			CO2,CO3
	B	Bluetooth, Wi-Fi Standard, WiMAX Standard, Zigbee, Ultra-wideband(UWB)			CO2,CO3
	C	Routing protocols classification, challenges in MANET routing, DSDV, DSR, AODV			CO2,CO3
	<b>Unit 5</b>	<b>Mobile Transport Layer</b>			
	A	Traditional TCP, Indirect TCP, Snooping TCP, Mobile TCP, Transaction oriented TCP			CO2,CO3
	B	TCP over 2.5G/3G/4G wireless network, File System			CO2
	C	World Wide Web, Wireless Application Protocol: architecture, protocol stack			CO2,CO3

## Computer Graphics and Animation

<b>School: SET</b>		<b>Batch : 2020 onwards</b>	
<b>Program: MCA/M.Sc</b>		<b>Current Academic Year: 2020</b>	
<b>Branch: NA</b>		<b>Semester:</b>	
1	Course Code	<b>MCT213</b>	
2	Course Title	<b>Computer Graphics and Animation</b>	
3	Credits	3	
4	Contact Hours (L-T-P)	3-0-0	
	Course Status	core	
5	Course Objective	This course is designed to provide a comprehensive introduction to computer graphics and animation. A thorough introduction to graphics techniques, two dimensional system and mapping, important drawing algorithm, two-dimensional transformation; Clipping, filling and an introduction to 3-D graphics. This course also provide students the fundamental skills to produce traditional style animation and the knowledge of principles of animation.	
6	Course Outcomes	Students will be able to: <b>CO1:</b> <i>Analyse</i> and classify the components and building approaches of computer graphics systems. <b>CO2:</b> <i>Illustrates</i> the technology requirement for a computer graphics system. <b>CO3:</b> <i>Design</i> interactive computer graphics API programs. <b>CO4:</b> <i>Apply</i> in-depth knowledge of display systems, image synthesis, shape, modelling, and interactive control of 3D computer graphics applications. <b>CO5:</b> <i>Formulate</i> an understanding of mapping from a world coordinates to device coordinates, clipping, and projections. <b>CO6:</b> <i>Discuss</i> the application of computer graphics and animation concepts in the development of computer games, information visualization, and business applications.	
7	Course Description	Computer Graphics and animation is a study of the hardware and software principles of interactive raster graphics and animation techniques. Topics include an introduction to the basic concepts, 2-D and 3-D modelling and transformations, viewing transformations, projections, rendering techniques, graphical software packages and graphics systems.	
8	Outline syllabus		CO Mapping
	<b>Unit 1</b>	<b>Graphic System Primitives</b>	
	A	Display devices, Input and Output Devices. Output	CO1, CO2

		Primitives: Points and Lines, Pixels, Pixel addressing and Object Geometry, Planes, Frame buffers, vector and character generation	
	B	Line-Drawing Algorithms-DDA and Brenham's algorithms. Circle-Generating algorithms	CO1, CO2
	C	Scan-Line, Polygon Fill algorithms, Boundary Fill and Flood-Fill Algorithms	CO1, CO2,CO3
	<b>Unit 2</b>	<b>Transformations</b>	
	A	Basic Transformations, Composite Transformations	CO1, CO2,CO3
	B	General Fixed-Point Scaling, Other Translations-Reflection, Shear	CO2, CO3
	C	Transformations between Coordinate Systems, Raster Methods for Transformations	CO1, CO2,CO3
	<b>Unit 3</b>	<b>Windowing and Clipping And 3D Transformation</b>	
	A	Window, Viewport, Window-To-Viewport Coordinate transformation, zooming and panning, Clipping Operations, Point Clipping, Line Clipping-Cohen-Sutherland Line Clipping, Cohen-Sutherland Line Clipping Algorithm, Midpoint Subdivision Line Clipping Algorithm, Cyrus Beck clipping	CO2,CO3,CO4
	B	3-D transformation: Translation, Rotation, Scaling, Shearing, Reflecting	CO2,CO3,CO4
	C	Composite Transformations, Rotation about an arbitrary line, Reflection through an arbitrary plane.	CO2,CO3,CO4
	<b>Unit 4</b>	<b>Parallel Projections &amp; Hidden surface Removal</b>	
	A	Orthographic Projections, Oblique Projections, Parallel Projections	CO4,CO5
	B	Perspective Projections, One Point, Two, Three Point vanishing points	CO4,CO5
	C	Back Face Detection, Depth Buffer Method, Depth Sorting Method (Painter's algorithm)	CO3,CO4,CO5
	<b>Unit 5</b>	<b>Animation</b>	
	A	Introduction to Animation, Principles of Animation, Types of Animation. Moving, Rotating, and Scaling, Viewing Your Animation	CO2,CO5,CO6
	B	The Graph Editor Window, Editing the Curve, Other Types of Curves, Modifying Curves, Automatic Key Framing, Rotation Explained, Rotation Using F Curves,	CO2,CO5,CO6
	C	Animating Other, Features, Keying Sets, Vertex Animation, Animation Following Curves,	CO3,CO6

2	Course Title	Web and its application	
3	Credits	3	
4	Contact Hours (L-T-P)	3-0-0	
	Course Status	Compulsory	
5	Course Objective	Provide the knowledge to design and develop web application with and without database. Students will gain the skills and project-based experience needed for entry into web application and development careers.	
6	Course Outcomes	CO1: Examine the functionality required in our Website. Use javascript for clientside validation CO2: Explain the concept of servlet and EJB CO3: Use JSP for creating dynamic website CO4: Analyse the requirement of JQuery and Ajax CO5: Evaluate the use of RMI and networking. CO6: Develop a website using Jsp, JQuery , Ajax, etc.	
7	Course Description	This course is an overview of the modern Web technologies used for the Web development. The purpose of this course is to give students the basic understanding of how things work in the Web world from the technology point of view as well as to give the basic overview of the different technologies.	
8	Outline syllabus		CO Mapping
	<b>Unit 1</b>	<b>INTRODUCTION TO HTML &amp; JAVA SCRIPT</b>	
	A	HTML basic tags, various links implementation, image map, table formatting, form design.	CO1
	B	<b>Java Script:</b> Introduction, syntax, comment, statement, variable, operators, Conditional statements, loop statements	CO1
	C	Functions, object, events, Accessing form elements, validating form elements	CO1
	<b>Unit 2</b>	<b>Servlets &amp; ENTERPRISE JAVA BEANS</b>	
	A	Servlet, Creating Servlet, Managing request and response in Servlet,	CO2
	B	Servlet Collaboration, Session Tracking	CO2
	C	EJB - Introduction, Components of EJB, Architecture of EJB	CO2
	<b>Unit 3</b>	<b>JAVA SERVER PAGES</b>	
	A	Introduction to JSP , Life cycle of JSP,JSP Application Design	CO3, CO6
	B	Scripting elements, scriptlet tag, expression tag, declaration tag,	CO3 CO6
	C	Implicit Objects, JSP Objects, Directive Elements	CO3, CO6
	<b>Unit 4</b>	<b>Jquery &amp; AJAX</b>	
	A	<b>Jquery &amp; AJAX:</b> Introduction, syntax, selector, events, JQuery	CO4, CO6

		effect: hide/show, fade, slide, animate and stop			
	B	Jquery HTML: get, set, add, remove, css			CO4, CO6
	C	AJAX: Introduction, request, response, event			CO4, CO6
	<b>Unit 5</b>	<b>RMI AND JAVA NETWORKING</b>			
	A	Remote Method Invocation - Introduction, Structure of RMI			CO5
	B	Sockets: Introduction, Application, TCP socket, UDP socket			CO5
	C	Socket Implementation, Client and Server sockets, data transmission over socket			CO5

## 2.1 Template A1: Syllabus for Theory Courses (SAMPLE)

<b>School:</b>		<b>School of Engineering and technology</b>	
<b>Department</b>		<b>Department of Computer Science and Engineering</b>	
<b>Program:</b>		<b>MSc</b>	
<b>Branch:</b>		<b>CS&amp;IT</b>	
1	Course Code	MCT215	
2	Course Title	<b>Cryptography and Network Security</b>	
3	Credits	3	
4	Contact Hours (L-T-P)	3-0-0	
	Course Status	Elective	
5	Course Objective	To Have a good understanding of how applications can communicate securely and what tools and protocols exist in order to offer different levels of security	
6	Course Outcomes	On successful completion of this module students will be able to CO1: Illustrate network security services and mechanisms. CO2: Evaluate Symmetrical and Asymmetrical cryptography. CO3: Apply Data integrity, Authentication, Digital Signatures. CO4: Analyze Various network security applications, IPsec, Firewall, IDS, Web security, Email security, and Malicious software etc. CO5: Demonstrate various factors which affect the security of network CO6: Estimate the measure adapted towards network security	
7	Course Description	This course introduces aspects of cyber security, encompassing the principles, to analyze the data, identify the problems, and choose the relevant countermeasures to apply.	
8	Outline syllabus		CO Mapping
	<b>Unit 1</b>	<b>Security in Computing Environment and Cryptography</b>	
	A	Need for Security, Security Attack, Security Services, Information Security, Methods of Protection.	CO1, CO2
	B	Terminologies used in Cryptography, Substitution Techniques, Transposition Techniques.	CO5, CO6, CO3
	C	Characteristics of Good Encryption Technique, Properties of Trustworthy Encryption Systems, Types of Encryption Systems, Confusion and Diffusion, Cryptanalysis.	CO6, CO4, CO2
	<b>Unit 2</b>	<b>Encryption</b>	

	A	Data Encryption Standard (DES) Algorithm, Double and Triple DES, Security of the DES	CO1,CO2, CO3
	B	Advanced Encryption Standard (AES) Algorithm, DES and AES Comparison.	CO4,CO5,CO6
	C	Characteristics of Public Key System, RSA Technique, Key Exchange, Diffie-Hellman Scheme, Cryptographic Hash Functions, Digital Signature, Certificates, Certificate Authorities.	CO1,CO6, CO3, CO4
	<b>Unit 3</b>	<b>Security</b>	
	A	Secure Programs, Non-malicious Program Errors, Viruses and Other Malicious Code, Targeted Malicious Code, Methods of Control.	CO1,CO2, CO4
	B	Objects to be Protected, Protection Methods of Operating Systems	CO6, CO3,CO1
	C	Memory Protection, File Protection, User Authentication.	CO3,CO4,CO6,CO5
	<b>Unit 4</b>	<b>Network security</b>	
	A	Network Concepts, Threats in Networks, Network Security Controls.	CO1,CO2, CO6
	B	Overview of IP Security (IPSec), IP Security Architecture, Modes of Operation, Security Associations (SA), Authentication Header (AH), Encapsulating Security Payload (ESP), Internet Key Exchange.	CO2,CO4,CO6
	C	Web Security Requirements, Secure Socket Layer (SSL), Transport Layer Security (TLS), Secure Electronic Transaction (SET)	CO1,CO3,CO5
	<b>Unit 5</b>	<b>Electronic Mail Security</b>	
	A	Threats to E-Mail, Requirements and Solutions, Encryption for Secure E-Mail, Secure E-Mail System	CO1,CO2, CO6
	B	Firewalls – Types, Comparison of Firewall Types, Firewall Configurations.	CO1.CO2,CO6,CO5
	C	Planning and Enforcing Security Policies: Planning Security Policies, Risk Analysis, Security Policies for an Organization, External Security.	CO2,CO3,CO5
	Mode of examination	Theory	
	Weightage	CA	MTE ETE

	Distribution	30%	20%	50%

**MCA 266: Software Engineering & Testing**

<b>School:</b>		<b>School of Engineering and Technology</b>	
<b>Department</b>		<b>Department of Computer Science and Engineering</b>	
<b>Program:</b>			
<b>Branch:</b>			
1	Course Code	MCT216	
2	Course Title	Software Engineering & Testing	
3	Credits	3	
4	Contact Hours (L-T-P)	3-0-0	
	Course Status	Core	
5	Course Objective	The course will prepare our students to be successful professionals in the field with solid fundamental knowledge of software engineering. Course focuses on Utilizing and exhibiting strong communication and interpersonal skills when functioning as members and leaders of multi-disciplinary teams. This Course allows students to apply their foundations in software engineering to adapt to readily changing environments using the appropriate theory, principles and processes.	
6	Course Outcomes	Students will be able to: CO1: Choose software model to apply on particular kind of project. CO2: Summarize various requirements for the Application under development CO3: Make use of Unified Modeling Language in software specification documents CO4: Inspect code using various testing techniques to meet user needs as per SRS CO5: Develop and deliver quality software as an individual or as part of a multidisciplinary team CO6: Adapt process of designing, constructing, and testing end user applications that will satisfy user needs	
7	Course Description	This course covers the software development process from requirements elicitation and analysis, through specification and design, to implementation, integration, testing, and maintenance (evolution).	
8	Outline syllabus		CO Mapping
	<b>Unit 1</b>	<b>Software Engineering and process models</b>	
	A	Introduction to software engineering, Importance of software, Software characteristics, Software applications, Software crisis and its causes.	CO1
	B	Software Process models: Waterfall model, Incremental model, Prototyping Model, Spiral Model, V model	CO1

	C	Agile Process models: Extreme Programming (XP), Adaptive Software Development (ASD), Scrum	CO1
	<b>Unit 2</b>	<b>Software requirement Specification</b>	
	A	Requirement Engineering process, Elicitation techniques, Review and Management of User Needs, Types of Requirements	CO2
	B	Feasibility study, DFD, data dictionary , decision tables	CO2
	C	SRS Document, IEEE standards for SRS with examples.	CO2
	<b>Unit 3</b>	<b>Software Design</b>	
	A	Design Concepts, Design Strategies: Function Oriented Design, Object Oriented Design, Top-Down and Bottom-Up Design	CO3
	B	Effective modular design: Functional independence, Cohesion, Coupling, Design documentation	CO3
	C	UML Diagrams and Tools: Introduction to UML Diagrams, Use Case, Object and Class, Interaction diagram: Sequence & Collaboration ,Introduction to Rational Rose tool	CO3,CO6
	<b>Unit 4</b>	<b>Software Testing</b>	
	A	Fundamental of testing: Objectives, principles, myths and facts, Error, Mistake, Bug, Fault and Failure, limitations of testing	CO4
	B	Levels of testing: Unit Testing, Integration Testing, System Testing, Acceptance Testing: Alpha & Beta Testing, Integration techniques	CO4,CO6
	C	White Box Testing, Black Box Testing, Verification and Validation, Test case designing, Coding Guidelines, Debugging	CO4,CO6
	<b>Unit 5</b>	<b>Maintenance &amp; Quality Management</b>	
	A	Introduction to Maintenance , Need for Maintenance, Categories of Maintenance: Preventive, Corrective and Perfective Maintenance, Cost of Maintenance	CO5,CO6
	B	Quality Concepts: Quality, Quality Control, Cost of Quality, Software Quality Assurance , SQA Plan , Software Reliability: Measures of Reliability and Availability, Software Safety	CO5,CO6
	C	Statistical Software Quality Assurance: Six Sigma, The ISO 9000 Quality Standards, Capability Maturity Model	CO5,CO6
	Mode of examination	Theory/Jury/Practical/Viva

# TERM-VI

---

<b>School: SET</b>		<b>Batch : 2020-22</b>		
<b>Program: MCA</b>		<b>Current Academic Year: 2020-20</b>		
<b>Branch: NA</b>		<b>Semester: IIIrd</b>		
<b>1</b>	<b>Course Code</b>	<b>MCA354</b>		
<b>2</b>	<b>Course Title</b>	<b>SEMINAR</b>		
<b>3</b>	<b>Credits</b>	<b>4</b>		
<b>4</b>	<b>Contact Hours (L-T-P)</b>			
	<b>Course Status</b>	<b>PG</b>		
5	Course Objective	The students will be identifying relevant information, defining and explaining topic chosen for seminar. Students will apply theories, methods and knowledge bases from multiple fields to a single question or problem.		
6	Course Outcomes	Students will be able : CO1: Develop the ability for independent learning and acquiring knowledge. CO2: Identify and discuss domain specific problems. CO3: Choose a multidisciplinary strategy to address real-world issues. CO4: Apply principles of ethics and respect while interaction with others. CO5: Demonstrate the ability to participate effectively in discussions. CO6: Improve oral and written communication skills.		
7	Course Description	This is a 4-credit course aimed at teaching 2nd year MCA students to make research presentations. Each student has to choose a paper / topic related to Computer Science and Engineering. It need not be related to the Mtech project. A detailed literature review of a specific research problem. This can include: background related to the problem, categorization of approaches, specific approaches, etc.		
8	Outline syllabus			
		Each student has to choose a paper / topic related to Computer Science and Engineering. It need not be related to the MCA project. A detailed literature review of a specific research problem. This can include: background related to the problem, categorization of approaches, specific approaches, etc. Guidelines/Suggestions on how to prepare a good talk will be made by MCA coordinator.
