

SCHOOL OF ENGINEERING AND TECHNOLOGY Master of Technology- Computer Science and Engineering

Programme Code: SET0130 Duration- 2 Years Full Time

PROGRAM STRUCTURE AND CURRICULUM & SCHEME OF EXAMINATION 2020

M.Tech CSE with specialization in Software Engineering

M.Tech CSE with specialization in Data Science & Analytics

M.Tech CSE with specialization in Networking and Cyber Security

- 1. Standard Structure of the Program at University Level
- 1.1 Vision, Mission and Core Values of the University

Vision of the University

To serve the society by being a global University of higher learning in pursuit of academic excellence, innovation and nurturing entrepreneurship.

Mission of the University

- 1. Transformative educational experience
- 2. Enrichment by educational initiatives that encourage global outlook
- 3. Develop research, support disruptive innovations and accelerate entrepreneurship
- 4. Seeking beyond boundaries

Core Values

- Integrity
- Leadership
- Diversity
- Community

Note: Detailed Mission Statements of University can be used for developing Mission Statements of Schools/ Departments.

Vision of the School

To become a globally acclaimed institution of higher learning in engineering and technology promoting excellence in research, innovation and entrepreneurship

Mission of the School

- 1. To impart quality education with strong industry & academic connectivity in the expanding fields of Engineering and Technology in a conductive and enriching learning environment.
- 2. To product technocrats equipped with technical & soft skills and experiential learning required to stay current with the modern tools in emerging technologies to fulfill professional responsibilities and uphold ethical values.
- 3. To inculcate a culture of interdisciplinary research, innovation and entrepreneurship to provide sustainable solutions to meet the growing challenges and societal needs.
- 4. To foster collaborative learning and to play adaptive leadership role in professional career and pursuit of higher education through effective mentoring and counseling.

Core Values

- Industry & Academic Connectivity
- Experiential learning
- Interdisciplinary research
- Global

1.2 Vision and Mission of the Department

Vision of the Department

To be recognized as the fountainhead of excellence in technical knowledge and research in computer science and engineering to attract students and scholars across the globe

Mission of the Department

- 1. To strengthen core competency of students to be successful, ethical, effective problem solver in Computer Science & Engineering through analytical learning.
- 2. To promote interdisciplinary research & innovation-based activities in emerging areas of technology globally
- 3. To facilitate and foster the industry-academia collaboration to enhance entrepreneurship skills and acquaintance with corporate culture.
- 4. To inculcate in them a higher degree of social consciousness and moral values towards solving interdisciplinary societal problems using industry-academia collaboration

Core Values

- Competency
- Global
- Entrepreneurship Skills
- Interdisciplinary research

1.3 Programme Educational Objectives (PEO)

1.3.1 Writing Programme Educational Objectives (PEO)

Program educational objectives are broad statements that describe the career and professional accomplishments that the program is preparing graduates to achieve.

The Program Educational Objectives (PEOs) of UG Program in Computer Science & Engineering are:

- **PEO-1** The graduates will establish themselves as professionals by solving real-life problems using exploratory and analytical skills acquired in the field of Computer Science and Engineering.
- **PEO-2** The graduates will provide sustainable solutions to ever changing interdisciplinary global problems through their Research & Innovation capabilities.
- $\ensuremath{\text{PEO-3}}$ The graduates will become employable, successful entrepreneur as an outcome of Industry-Academia collaboration.
- **PEO-4** The graduates will embrace professional code of ethics while providing solution to multidisciplinary social problems in industrial, entrepreneurial and research environment to demonstrate leadership qualities

Methods of Forming PEO's

- STEP 1: The needs of the Nation and society are identified through scientific publications, industry interaction and media.
- STEP 2. Taking the above into consideration, the PEOs are established by the Coordination Committee of the department.
- STEP 3. The PEOs are communicated to the alumni and their suggestions are obtained.
- STEP 4. The PEOs are communicated to all the faculty members of the department and their feedback is obtained.
- STEP 5. The PEOs are then put to the Board of Studies of the department for final approval.

[Note: Prepare a file for the same, how you arrive for PEO's]

1.3.2 Map PEOs with Mission Statements:

| DEPARTMENT PEOS DEPT OF CSE MISSION STATEMENTS | 1. The graduates will establish themselves as professionals by solving real-life problems using exploratory and analytical skills acquired in the field of Computer Science and Engineering. | 2. The graduates will be able to provide sustainable solutions to ever changing interdisciplinary global problems through their Research & Innovation capabilities. | 3. The graduates will become employable, successful entrepreneur and innovator as an outcome of Industry- Academia collaboration. | 4. The graduates will be able to embrace professional code of ethics while providing solution to multidisciplinary social problems in industrial, entrepreneurial and research environment to demonstrate leadership qualities. | |
|--|---|--|--|---|-------|
| 1. To strengthen core competency of students to be successful, ethical, effective problem solver in Computer Science & Engineering through analytical learning. | 3 | 3 | 2 | 2 | 10/12 |
| 2. To promote interdisciplinary research & innovation based activities in emerging areas of technology globally. | 2 | 3 | 2 | 2 | 9/12 |
| 3. To facilitate and foster the industry- academia collaboration to enhance entrepreneurship skills and acquaintance with corporate culture. | 2 | 2 | 3 | 3 | 10/12 |
| 4: To inculcate in them a higher degree of social consciousness and moral values towards solving interdisciplinary societal problems using industry-academia collaboration | 2 | 2 | 2 | 3 | 9/12 |
| | 9/12 | 10/12 | 9/12 | 10/12 | 83% |

Enter correlation levels 1, 2, or 3 as defined below:

1. Slight (Low) 2. Moderate (Medium) 3. Substantial (High)

If there is no correlation, put "-"

1.3.3 Program Outcomes (PO's)

| | Advanced | Ability to apply advanced knowledge of mathematical, scientific |
|-------------|-----------------|---|
| PO1: | Technical | and computing to carry out independent research and investigate |
| | Knowledge | complex problems of global benchmark. |
| | Research and | Achieve and understand research-based solutions for problems in |
| PO2: | | _ |
| | Development | industry and academia using contemporary research methods. |
| | | Enables academic adherence by practice of method and |
| | | environment for teaching which is incorporated within the |
| PO3: | Pedagogy | curriculum enabling life-long learning and professional |
| | | development through self-study, continuing education, |
| | | professional and doctoral level studies. |
| | Innovation and | Inculcate innovative approaches to develop solutions towards |
| PO4: | Entrepreneurial | existing real-world problem(s) to create value and wealth for the |
| | Entrepreneuriai | betterment of the individual and society at large. [F] |
| | | Inculcating the human, social and business context while |
| PO5: | Societal Values | knowledge discovery by providing exposure to global view and |
| | | diversity in the world and will utilize their engineering skills. |
| | Personal and | Recognize the need of ethical, legal and societal implications to |
| PO6: | Professional | engage in self-governing and life-long learning by making use of |
| | Ethics | professional principles. |
| | | Ability to develop communication skills so that they are able to |
| PO7: | Communication | express ideas clearly and persuasively, in written and oral forms |
| | Skills | in a substantial technical manner. |
| | | Ability to engage in independent and life-long learning in the |
| PO8: | Life-long | broadest context of research and technological change with the |
| 100. | learning | aim to educate the society and peers. |
| | | To apply the software engineering principles and practices to |
| PSO1: | Software | provide high quality software solutions using state of art |
| PSO1: | Engineering | |
| | | technologies. |
| Dac t | Data Science & | To develop research solutions in the field of data engineering by |
| PSO2: | Analytics | using modern tools to provide innovative solutions for complex |
| | - | data science problems. |
| PSO3: | Networking and | To apply networking principles to understand cyber security |
| | Cyber Security | issues and provides solutions to real world security problems. |

1.3.4 Mapping of Program Outcome Vs Program Educational Objectives

| Mapping | PEO1 | PEO2 | PEO3 | PEO4 |
|---------|------|------|------|------|
| PO1: | 3 | 3 | 2 | 1 |
| PO2: | 3 | 3 | 3 | 1 |
| PO3: | 2 | 2 | 3 | 3 |
| PO4: | 2 | 2 | 3 | 2 |
| PO5: | 1 | 2 | 2 | 3 |
| PO6: | 1 | 1 | 2 | 3 |
| PO7: | 1 | 1 | 3 | 2 |
| PO8: | 2 | 3 | 1 | 1 |
| PSO1: | 2 | 3 | 1 | 3 |
| PSO2: | 3 | 3 | 2 | 2 |
| PSO3: | 3 | 3 | 2 | 2 |

1. Slight (Low)

2. Moderate (Medium)

3. Substantial (High)

1.3.5 Program Outcome Vs Courses Mapping Table¹:

| | | | PO1: | PO2: | PO3: | PO4: | PO5: | PO6: | PO7: | PO8: | PSO1: | PSO2: | PSO3: |
|-------------|------------------------------|-----|------------------------------------|--------------------------|----------|-----------------------------------|-----------------|--|-------------------------|--------------------|-------------------------|-----------------------------|----------------------------------|

² Each course outcome (Based on Blooms Taxanomy-CO1, CO2, CO3, CO4, CO5, and CO6) of the course needs to map with PO. This table evolves once faculty has mapped each course outcomes of their respective course with PO's.

1-Slight (Low)

2-Moderate (Medium) 3-Substantial (High)

Course Outcome

- **Course Outcomes**—What is it?
 - Course outcomes (COs) are clear statements of what a student should be able to demonstrate on completion of a course.
 - COs should be assessable and measurable knowledge, skills, abilities and attitudes that student attains by the end of the course.
 - It is generally good idea to identify between 4 and 7 outcomes.
 - All courses in a particular programme shall have their own PO.
 - Each CO is mapped to relevant PO.
 - The teaching learning process and assessment process are to be designed in a way to achieve the COs.

Beginning words for Course Outcome:

Active verbs developed based on Bloom's Taxonomy

| Knowledge | Understand | Apply | Analyze | Evaluate | Create |
|--|--|--|--|---|---|
| define identify describe label list name state match recognize select examine locate memorize quote recall reproduce tabulate tell copy discover duplicate enumerate | explain describe interpret paraphrase summarize classify compare differentiate discuss distinguish extend predict associate contrast convert demonstrate estimate express Identify indicate Infer relate | solve apply illustrate modify use calculate change choose demonstrate discover experiment relate show sketch complete construct dramatize interpret Manipulate Paint Prepare produce | analyze compare classify contrast distinguish infer separate explain select categorize connect differentiate discriminate divide order point out prioritize subdivide survey advertise appraise Break down | reframe criticize evaluate order appraise judge support compare decide discriminate recommend summarize assess choose convince defend estimate find errors grade measure predict rank | design compose create plan combine formulate invent hypothesize substitute write compile construct develop generalize integrate modify organize prepare produce rearrange rewrite role-play |

TERM-I

Analysis and Design of Algorithm

| School | l: SET | Batch: 2019 | | | | | | | | |
|--------|------------------|--|----------------|--|--|--|--|--|--|--|
| Progra | am: M.Tech | Current Academic Year: 2019-2021 | | | | | | | | |
| | h: Data Science | Semester: I | | | | | | | | |
| 1 | Course Code | CSE 611 Course Name: Analysis and Design of | Algorithm | | | | | | | |
| 2 | Course Title | Analysis and Design of Algorithm | | | | | | | | |
| 3 | Credits | 5 | | | | | | | | |
| 4 | Contact Hours | 3-1-2 | | | | | | | | |
| | (L-T-P) | | | | | | | | | |
| | Course Status | PG | | | | | | | | |
| 5 | Course Objective | The objective of the course is to teach techniques for ef | fective | | | | | | | |
| | _ | problem solving in computing. The use of different par | adigms of | | | | | | | |
| | | problem solving will be used to illustrate efficient ways | s to solve a | | | | | | | |
| | | given problem. In each case emphasis will be placed or | rigorously | | | | | | | |
| | | proving correctness of the algorithm. In addition, the ar | nalysis of the | | | | | | | |
| | | algorithm will be used to show the efficiency of the alg | orithm over | | | | | | | |
| | | the naive techniques. | | | | | | | | |
| 6 | Course Outcome | 1. Analyze the performance of algorithms. | | | | | | | | |
| | | 2. Apply the Concept of Divide and Conquer method to | o solve real | | | | | | | |
| | | world problems. | | | | | | | | |
| | | 3. Demonstrate the Dynamic programming techniques | | | | | | | | |
| | | 4. Describe the Concept of Greedy method to solve the | real world | | | | | | | |
| | | problems of backtracking | | | | | | | | |
| | | 5. Explain the various mathematical concepts and impl | lement the | | | | | | | |
| | | pattern matching algorithms. | | | | | | | | |
| | | 6. Propose algorithms to real life problems | | | | | | | | |
| 7 | Course | | | | | | | | | |
| | Description | | | | | | | | | |

| 2 | Course Title | Soft Computing Techniques | | | | | |
| 3 | Credits | 3 | | | | | |
| 4 | Contact Hours | 3-0-0 | | | | | |
| | (L-T-P) | | | | | | |
| | Course Status | PG | | | | | |
| 5 | Course Objective | Students will try to learn: | | | | | |
| | | To conceptualize the working of human brain using ANN. To become familiar with neural networks that can learn from available examples and generalize to form appropriate rules for inference systems. To introduce the ideas of fuzzy sets, fuzzy logic and use of heuristics based on human experience. To provide the mathematical background for carrying out the optimization and familiarizing genetic algorithm for seeking global optimum in self-learning situation. | | | | | |
| 6 | Course Outcome | After Successful completion of this course the st to: | audent will be able | | | | |
| 7 | Course Description | Identify basic mathematical/statistical methodometries. Formulate learning techniques used in difference of the second of the seco | ent cases. on their use in the es, uncertainties, ms of Engineering s in Decision and chniques and tools. | | | | |
| | | Those are frequently required for understanding a exploratory data analysis techniques, and knowle intelligent systems. | edge discovery and | | | | |

List of Experiments

- Write a PHP program to print a message.
- Write a PHP program to find a square of a number.
- Write a PHP program to swap two numbers without using 3rd variable.
- Write a PHP program to find the area of rectangle, square, circle using predefined value.
- Write a PHP program to find factorial of a number
- Write a PHP program to print Fibonacci series upto 17.
- Write a PHP program to implement calculator.
- Write a PHP program to find the smallest number from an array.
- Write a PHP program to arrange the numbers in ascending order.
- Write a PHP program to make a login form and check the input using another PHP page.
- Write a PHP program to find the sum of all elements in a multidimensional array using for loop.
- Write a PHP program to validate a form input.
- Write a PHP program of file handling (reading a file line by line until end of file
- Write a PHP program for uploading a file in PHP.
- Write a program to read input data, from table and display all these information in tabular form on output screen.

| | Course Status | PG |
| 5 | Course Objective | In this course, students will use the wide range of knowledge and skills that they have gathered over the course of their post graduate program. This course presents the opportunity to build upon a core of learning, gained in the earlier years, and to broaden the scope of that knowledge. |
| 6 | Course Outcomes | Students will be able to: CO1: Demonstrate a sound technical knowledge of selected project topic. CO2: Plan problem identification, formulation and solution strategies. CO3: Design engineering solutions to complex problems utilizing a systematic approach. CO4: Develop solutions of real world engineering problems. CO5: Utilize technology tools for communication, collaboration, information management, and decision support. CO6: Communicate project work effectively with research community at large in written and oral forms, mandatorily a research paper. |
| 7 | Course Description | Students are required to take complete ownership of their project and this necessitates a considerable shift in attitude as the project demands that, beyond the exercise of knowledge and skills, they must be self-regulating and self-directed in their time management. |
| Oı | ıtline syllabus | |

Project being the student's important activity at the institution, it fulfills a purpose of synthesis of all the knowledge they have acquired throughout the different years. In addition, this knowledge must be used in a particular way, in order to solve a specific problem, which lets student demonstrate their aptitude by applying this knowledge.

This project also helps the student to analyze and determine the current requirements of the society, to understand the whole project development process. Makes student follow strict schedules, learn efficient time management & make changes as per the constrained requirements. It also helps student to improve communication skills. All these factors affect the overall development of student for his/her future profession.

| 11 | Faculty who will teach the course | | | |
| 12 | Will the course require any visiting faculty? | | | |
| | | | | |
| | Course objective (about 50 words): To acquire knowledge on the basics of Deep learning neural network. | | | |
| | To implement neural network using computati | | | |
| | To know the importance of the qualitative data | 7 1 | | |
| | To know the principles, tools and methods of v | | | |
| | Γο apply analytics for business situation. | | | |
| - | | | | |

Course contents(about 150 words) (include laboratory/design activities):

In this course student will learn different algorithm for simulating deep learning algorithm. Define train and use a deep Neural Network for solving real world problems that require artificial intelligence based solutions. In this course student will also learn the concepts and techniques related to web analytics. Exploration of various parameter used for web analytics and their impact. Can use various tools and techniques for web analytics.

15. Lecture Outline (with topics and number of lectures)

| Module | Topic | No of hours |
|--------|---|-------------|
| No. | · | NO OI HOUIS |
| 1 | Basics of Deep leaning- Deep learning architectures: Convolutional Neural Networks: Neurons in Human Vision-The Shortcomings of Feature Selection-Vanilla Deep Neural Networks Don't Scale-Filters and Feature Maps-Full Description of the Convolutional Layer-Max Pooling-Full Architectural Description of Convolution Networks-Closing the Loop on MNIST with Convolutional Networks-Image Preprocessing Pipelines Enable More Robust Models-Accelerating Training with Batch Normalization-Building a Convolutional Network for CIFAR-10-Visualizing Learning in Convolutional Networks. | 7 |
| 2 | Memory Augmented Neural Networks: Neural Turing Machines-Attention-Based Memory Access-NTM Memory Addressing Mechanisms-Differentiable Neural Computers-Interference-Free Writing in DNCs-DNC Memory Reuse-Temporal Linking of DNC. Reinforcement Learning: Deep Reinforcement Learning Masters Atari GamesWhat Is Reinforcement Learning?-Markov Decision Processes (MDP)-Explore Versus Exploit-Policy versus Value Learning-Pole-Cart with Policy Gradients-Q-Learning and DeepQ-Networks | 7 |
| 3 | Web Analytics – Basics – Traditional Ways – Expectations – Data Collection – Clickstream Data – Weblogs – Beacons – JavaScript Tags – Packet Sniffing – Outcomesdata– Competitivedata–SearchEngineData. Qualitative Analysis – Customer Centricity – Site Visits – Surveys – Questionnaires – Website Surveys – Post visits – Creating and Running- Benefits of surveys – Critical componentsofsuccessfulstrategy. | 7 |
| 4 | Web Analytic concepts – URLS – Cookies – Time on site – Page views – Understand standard reports – Website content quality – Navigation reports (top pages, top destinations, site overlay). – Search Analytics – Internal search, SEO and PPC – Measuring Email and Multichannel Marketing – Competitive intelligence and Web 2.0 Analytics – Segmentation–Connectablereports. | 7 |

| componentsofsuccessfulstrategy. Web Analytic concepts – URLS – Cookies – Time on site – Page views – Understand standard reports – Website content quality – Navigation reports (top pages, top destinations, site overlay). – Search Analytics – Internal search, SEO and PPC. Google Analytics: Analytics - Cookies - Accounts vs Property – Tracking Code Tracking Unique Visitors - Demographics – Page Views & Bounce Rate Acquisitions CustomReporting. | |
