

# **Program and Course Structure**

School of Allied Health Science B.Sc. (Forensic Science)

**Program Code-SAH0120** 

Robert

#### 1. Standard Structure of the Program at University Level

#### 1.1 Vision, Mission and Core Values of the University

## Vision of the University

To serve the society by being a global University of higher learning in pursuit of academic excellence, innovation and nurturing entrepreneurship.

# Mission of the University

- 1. Transformative educational experience
- 2. Enrichment by educational initiatives that encourage global outlook
- 3. Develop research, support disruptive innovations and accelerate entrepreneurship
- 4. Seeking beyond boundaries

## **Core Values**

- Integrity
- Leadership
- Diversity
- Community

#### 1.2 Vision and Mission of the School

#### Vision of the School

To steer the School of Allied Health Sciences towards excellence in academics, innovation and entrepreneurship by constant endeavors

#### Mission of the School

- **1.** To create and sustain a stimulating and responsive academic inclusive environment.
- **2.** To regularly enhance the teaching contents & techniques in keeping with current and future trends.
- **3.** To provide a competitive and career-oriented programme.
- **4.** To strengthen the main line medical and health services.

#### **Core Values**

- Skilled Professional
- Multidimensional
- Compassion
- Management

## 1.3 Programme Educational Objectives (PEO)

**PEO1**: To gain a knowledge of basic science application in forensic field.

**PEO1**: To gain knowledge of forensic examination of evidences and investigation of all types of evidences

**PEO1**: Develop a conceptual understanding of criminal justice systems, rule of evidence, legal system.

**PEO1**: They can apply their knowledge of forensic science in different Investigative agencies.

**PEO1** Laboratory skills to exacting standards of precision and care.

## **1.3.2** Map PEOs with Mission Statements:

PEO Statements	School Mission 1	School Mission 2
PEO1:	3	3
PEO2:	3	3
PEO3:	3	3
PEO4:	3	3
PEO5:	3	3

Enter correlation levels 1, 2, or 3 as defined below:

1. Slight (Low) 2. Moderate (Medium) 3. Substantial (High)

#### 1.3.3 Program Outcomes (PO's)

- **PO1**: Ability to acquire and apply knowledge and understanding of the chemical principles
- **PO2** : Ability to demonstrate thorough knowledge, understanding and skills in application of scientific methodology to undertake and report on experimental investigation.
- **PO3**: Possess high awareness of major issues and development of chemical research and competent in initiating, developing, and pursuing a scientific research.
- **PO4** : Ability to present technical, scientific and forensic information and arguments clearly and correctly, in written and oral presentation
- **PO5** : Ability to portray good interpersonal skills with high ability to work collaboratively as part of a team undertaking a range of different team roles
- **PO6**: Ability to act with integrity and good ethics in their profession and their obligation to society
- **PO7**: Ability to seek new knowledge, skills and manage relevant information from various sources.
- **PO8**: Ability to demonstrate knowledge and skills in analyzing and identifying business opportunities.
- **PO9**: Ability to demonstrate leadership, to take action and to get others involved.
- **PSO1**: This programme is an application-based programme where all the main stream science subject- Biology, Physics and chemistry are applied for the scientific investigation of crime.
- **PSO2**: It is a multidisciplinary, versatile and result oriented subject which dealt with different branches of science as well as law, medicine, medical jurisprudence and police.
- **PSO3**: Forensic techniques are used to process sample and evidences to solve crime.

## 1.3.4 Mapping of Program Outcome Vs Program Educational Objectives

	PEO1	PEO2	PEO3	PEO4	PEO5
PO1	3	3	1	3	3
PO2	3	3	3	3	3
PO3	3	3	2	3	3
PO4	2	3	3	3	3
PO5	2	2	2	2	2
PO6	3	3	3	3	3
PO7	3	3	3	3	3
PO8	3	3	2	2	2
PO9	2	2	2	3	2
PSO1	3	3	2	3	3
PSO2	3	3	3	3	3
PSO3	3	3	3	3	3

1. Slight (Low) 2. Moderate (Medium) 3. Substantial (High)

2	Course Title	Project-I	
3	Credits	1	
4	Contact Hours (L-T-P)	2-0-0	
	Course Status	Compulsory	
5	Course Objective	1. To know about the review of literature	
		2. To know about the research knowledge of particular topic.	
		3. To learn about the paper writing	
6	Course Outcomes	CO1: Understand the review of literature and its	
		Importance.	
		CO2: Understand about their topics	
		CO3: Understand the related works about their topics	
		CO4: Know to write the project and importance of it.	
7	Course	After completion of this project students will be able	
	Description	to understand about research methodology and	
	•	development in their topics.	
8	Outline syllabus	<u> </u>	CO
	•		Achievement
	Unit 1	Introduction	CO2
		A. Collect the material related to topic	
		B. Make proper format	
		C. Write it in your own words	
	Unit 2	Case study	CO1, CO3
		A. Collect the cases related to the topic	
		B. Study the outcomes and analyse the shortcomings	
		C. Include in your study	
	Unit 3	Review of literature	CO1, CO3
		A. Collect the research already done related to your	
		topic	
		B. Write it in your own language	
		C. Proper formatting

	Course Type	Compulsory
5	Course	1- Understand Animal physiology
	Objective	2- Focus on study and understanding of nature and their physiology
		3- Understand the economic importance of vector biology.

			Beyond Boundar
6	Course Outcomes	CO1: Gain knowledge of animal physiology	
	Outcomes	CO2: Thought detail concept of digestive system, respiratory	system
		etc. CO3: Understand the concept of aqua culture system.	
		CO4: Be able to describe interaction between different organ	system
		So i. Be usic to describe interaction between university organ	System.
7	Course	After completion of this course student will be able to kno	ow about the
	Description	physiology of human being and also economical biology.	
8	Outline syllabi	us	CO
			Mapping
	Unit 1	Animal Physiology -I	
	A	Tissues Structure, location, classification and functions of	CO1, CO2
		epithelial tissue, connective tissue, muscular tissue and	
		nervous tissue.	
	В	Bone and Cartilage Structure and types of bones and	CO1, CO2
		cartilages, Ossification, bone growth and resorption	
	С	Nervous System Structure of neuron, resting membrane	CO1, CO2
		potential, Origin of action potential and its propagation	
		across the myelinated and unmyelinated nerve fibers; Types	
		of synapse, Synaptic transmission and, Neuromuscular	
		junction; Reflex action and its types - reflex arc; Physiology of	
	Unit 2	hearing and vision  Animal Physiology –II	
	A	Muscle: Histology of different types of muscle; Ultra	CO1, CO2
		structure of skeletal muscle; Molecular and chemical basis of	201, 202
		muscle contraction; Characteristics of muscle twitch; Motor	
		unit, summation and tetanus	
	В	Reproductive System: Histology of testis and ovary;	CO1, CO4
		Physiology of male and female reproduction; Puberty,	
		Methods of contraception in male and female.	
	С	Endocrine System: Histology of endocrine glands - pineal,	CO1, CO2
		pituitary, thyroid, parathyroid, pancreas, adrenal; hormones	- ,
		secreted by them and their mechanism of action.	
	Unit 3	Endocrine System	
	A	Classification of hormones; Regulation of their secretion	CO1, CO4
	В	Mode of hormone action, Signal transduction pathways for	CO1, CO4
	С	steroidal and non-steroidal hormones;	CO1 CO4
		Hypothalamus (neuroendocrine gland) - principal nuclei involved in neuroendocrine control of anterior pituitary and	CO1, CO4
		endocrine system; Placental hormones	
		and a specific formation of the specific for	
	Unit 4	Animal Pathology	
	A	Life Cycle, Pathogenicity, clinical features, prophylaxis	CO1, CO4
	L.		· · · · · · · · · · · · · · · · · · ·

		3- To provide depth knowledge related to firearm	
6	Course Outcomes	CO1: To describe all type of marks and patters. CO2: Able to examine the all type physical evidence CO3: Able to analyze tool marks and firearms CO4: Able to do photography of crime scene.	
7	Course Description	After the completion of this course the students will be able to the Investigation and examination of footprint, tire marks, obtained and their restoration along with fire-arm evidences and understand the aspects of photography.	literated
8	Outline syllab	us	CO Mapping
	Unit 1	FORENSIC PHYSICS-I	11 8
	A	Footprints: Importance, Gait Pattern, Casting of footprints in Different medium, Taking Control samples.  Tire Marks/prints and Skid marks, taking control samples, Forensic Significance	CO1, CO2
	В	TOOL MARKS- Types of tool marks- compression marks, striated marks, combination of compression and striated marks, repeated marks, class characteristics and individual characteristics, tracing and lifting of marks, Photographic examination of tool marks and cut marks on clothes and walls etc.	CO1, CO2
	С	Restoration of erased / obliterated marks- Method of making-cast, punch, engrave; methods of obliteration, method of restoration- etching (etchings for different metals), magnetic, electrolytic etc., recording of restored marks – restoration of marks on wood, leather, polymer etc.	CO1, CO2
	Unit 2	FORENSIC PHYSICS- II	
	A	Paint - Types of paint and their composition, cases involve, collection and preservation of paint evidences microscopic analysis of paint pigments, micro-chemical analysis-solubility test, chemical and instrumental analysis of paint evidences.  Glass -Types of glass and their composition. Matching and comparison. Forensic examinations of glass fractures- rib marks, hackle marks, cone fracture, wavy, backward fragmentation, concentric and radial fractures. Colour, fluorescence, physical measurements, refractive index, density gradient, becke-line, specific gravity examination and elemental analysis of glass evidence	CO1, CO2

*	<b>SHARI</b>	DA
	UNIVERS	

В	<b>Soil</b> - Types and composition of soil, sample preparation,	CO1, CO2
	removal of contaminants, colour, molecular particle size distribution, turbidity test, pH measurements, microscopic examination, density gradient analysis, ignition-loss test,	
	elemental analysis, interpretation of soil evidence.	
С	<b>Fibres-</b> Types of fibres, forensic aspects of fibre examination- fluorescence, optical properties, refractive index, birefringence, dye analysis. Physical fit and chemical testing. TLC, IR-micro spectroscopy, Py-MS. Difference between natural and man-made fibres. Fibre comparison of dye Component	CO1, CO2
Unit 3	BALLISTICS	
A	Firearms-History and development of firearms. Classification of firearms. Weapon types and their operation. Firing mechanisms of different firearms.	CO3
	Internal ballistics – Definition, ignition of propellants, shape and size of propellants, manner of burning, and various factors affecting the internal ballistics: lock time, ignition time, barrel time, erosion, corrosion and gas cutting.	
В	External Ballistics – Vacuum trajectory, effect of air resistance on trajectory, base drag, drop, drift, yaw, shape of projectile and stability, trajectory computation, ballistics coefficient and limiting velocity, Measurements of trajectory parameters, introduction to automated system of trajectory computation and automated management of ballistic data.	CO3
С	Terminal Ballistics – Effect of projectile on hitting the target: function of bullet shape, striking velocity, striking angle and nature of target, tumbling of bullets, effect of instability of bullet, effect of intermediate targets, and influence of range. Ricochet and its effects, stopping power.	CO3
Unit 4	FIREARMS	
A	Ammunition - Types of ammunition characteristics of different types of cartridges and bullets. Primers and priming compounds. Projectiles. Headstamp markings on ammunitions.	CO3
В	Different types of marks produced during firing process on cartridge – firing pin marks, breech face marks, chamber marks, extractor and ejector marks.	CO3
С	Firearm Evidence - Matching of bullets and cartridge	CO3

	Objective	2- Apply the methods for preservation of digital evidence					
		3- Identify methods for data recovery					
6	Course Outcomes	CO1: Explain the role of digital forensics in the field of information assurance and cyber security. CO2: Illustrate the methods for data recovery, evidence collection CO3: Summarize duplication and preservation of digital evidence CO4: Create a method for gathering, accessing and applying new and existing legislation and industry trends specific to practice digital forensic					
7	Course	After the completion of this course the students will be able to	to understand				
	Description	about the cyber forensic their investigation & examination.					
8	Outline syllabu	S	CO Mapping				
	Unit 1	CYBER FORENSIC					

*	SHARDA
	UNIVERSITY

A	Introduction to computer /Cyber forensic	CO1, CO2						
В	Cyber forensic steps( identification, seizure, acquisition,							
	authentication, presentation, preservation) Who is	, ,						
	computer forensic expert.							
С	Cyber forensic investigation process, the goal of the	CO1, CO2						
_	, , , , , , ,							
	forensic investigation, why investigate, using email inapporiately, useof internet, email, or Pc in a non work							
	related properly infraction, auditing vs/ cyber forensic.							
Unit 2	BIOMETRIC							
A	What is Biometric, Use of Biometric, Model of Biometric	CO1, CO3						
	system? Various types of Biometric Method, User	, ,						
	acceptance, Evaluating accuracy.							
В	Advantages and disadvantages of biometric.	CO1, CO3						
С	General biometric system (identification and verification),	CO1, CO3						
	general architecture, comparison of different biometric	,						
	technologies, what make biometric difficult.							
Unit 3	EVIDENCE COLLECTION							
A	Volatile Evidence collection	CO2						
В	Non volatile Evidences collection (safeback, gettime, filet,	CO2						
	and excel, getfree swapfile and getswap, getslack,							
	temporary files).							
С	Detailed procedure for obtaining a bit stream backup of	CO2						
	hard drive, file system( details of file system, data structure							
	of file system, data recovery in different file system).							
Unit 4	ANALYTICAL TOOLS							
A	Concealment technique: Introduction to cryptography,	CO3						
	types of cryptogrphic algorithms (secret key cryptography,							
	public key cryptography, hash function).							
В	Electronic signature, stenography, reversing the	CO3						
	stenographic process, cloaking techniques (data hide and							
	seek).							
С	Renaming files, manipulating file system, data hiding on	CO3						
	NTFS with alternate data stream.							
Unit 5	CYBER FORENSIC TOOLS AND UTILITIES							
A	Introduction, examining a breadth of product, cyber tools	CO1,CO4						
	good, better, best: what the right incident response tool for							
	your organization.							
В	Tool review forensic toolkit, encase, cyber check suites,	CO1,CO4						
	what is disk imaging etc.							
C	Specification for forensic tool tested.	CO1,CO4
