

School of Allied Health Sciences

MSc (Clinical Research)

Program Code: SAH0101

Batch 2020-22

Vision of the University

To serve the society by being a global University of higher learning in pursuit of academic excellence, innovation and nurturing entrepreneurship.

Mission of the University

- 1. Transformative educational experience
- **2.** Enrichment by educational initiatives that encourage global outlook
- 3. Develop research, support disruptive innovations and accelerate entrepreneurship
- 4. Seeking beyond boundaries

Core Values

- Integrity
- Leadership
- Diversity
- Community

Vision of the School

To steer the School of Allied Health Sciences towards excellence in academics, innovation and entrepreneurship by constant endeavors

Mission of the School

- 1. To create the state of the art facility for quality teaching learning, research & innovation
- 2. To incorporate the contemporary standards in teaching & learning
- 3. To inculcate in the students values of integrity and compassion towards the care of patients and society.

Core Values

- Skilled professional
- Multidimensional
- Compassion
- Management

1.3.1 Programme Educational Objectives (PEO)

PEO1: To understand and analyze the impact of clinical research in a global, economic, environmental and societal context.

PEO2: To understand the regulatory perspectives and processes, standards and practices of ICH-GCP in conduct of ethical clinical trials.

PEO3:Forecast the resources necessary for developing and managingclinical research grants and trials as required and regulated by global regulatoryagencies.

PEO4:Demonstrate advanced critical thinking skills necessary to enhance employment opportunities or advancement within the clinical research industry.

PEO5: Effectively communicate and collaborate with health care providers and regulatory agencies to develop culturally diverse domestic and global strategies for biopharmaceutical product approvals.

1.3.2 Map PEOs with Mission Statements:

| PEO Statements | School Mission 1 | | | |
|----------------|------------------|---|--|--|
| PEO1: | 3 | 3 | | |
| PEO2: | 3 | 3 | | |
| PEO3: | 3 | 3 | | |
| PEO4: | 3 | 3 | | |
| PEO5: | 3 | 3 | | |

1.3.3 Program Outcomes (PO's)

On successful completion of the program, post graduate attributes will be:

PO1: Clinical research and basic medical knowledge: Apply knowledge of basic medical sciences and clinical research to be a successful member of the research team or a individual.

PO2:Design/development of trials:design and implement a clinical (patient-oriented) research study including selection of study methods, measures of the intervention and outcomes, data collection, management and analysis.

PO3: Modern tool usage: Create, select and apply appropriate techniques, resources and modern tools in clinical data management with an understanding of the limitations.

PO4: Ethics: Understand professional and ethical responsibilities in clinical research practice by following standards, norms and practices of ethical and regulatory bodies.

PO5: Communication: Understand the regulatory perspectives, norms and processes and communicate effectively with them for seeking permissions/approvals; being able to comprehend, write and present effectively trial reports and documentation

PO6: Individual and teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO7:Lifelong learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in broadest context of technological change.

| 1.3.4 Mapping of Program Outcome V | s Program | Educational | Objectives |
|------------------------------------|-----------|-------------|------------|
|------------------------------------|-----------|-------------|------------|

| | PEO1 | PEO2 | PEO3 | PEO4 | PEO5 |
|-----|------|------|------|------|------|
| PO1 | 2 | 3 | 3 | 2 | 2 |
| PO2 | 3 | 2 | 3 | 3 | 2 |
| PO3 | 1 | 1 | 2 | 3 | 3 |
| PO4 | 1 | 3 | 1 | 1 | 3 |
| PO5 | 2 | 3 | 3 | 2 | 3 |
| PO6 | 1 | 2 | 3 | 2 | 3 |
| PO7 | 3 | 2 | 1 | 2 | 3 |

1. Slight (Low)

2. Moderate (Medium)

3. Substantial (High)

1.3.5 Program Outcome Vs Courses Mapping Table¹:

| 5 | Course Objective | To train the students in the management of medical laboratory along with handling a variety of laboratory chemicals and instruments including electronic and advanced equipment used in modern medical laboratories. To make the students able to do routine laboratory testing under stipulated conditions. To prepare specimens and operate machines that automatically analyse samples. To provide the conceptual basis for understanding biochemical and particularly address the fundamental mechanisms of the biomolecules to facilitate the life. To develop diagnostic skills in clinical biochemistry and to provide an advanced understanding of the core principles and topics of Biochemistry and their experimental basis. | |
|---|---------------------------|---|-----|
| 6 | Course Outcomes | CO1: To understand the importance of acid, base, Buffers and nurition CO2: To understand the importance of chemistry of carbohydrates and proteins CO3: To understand the importance of chemistry of lipids and fatty acid CO4: To understand the clinical importance of enzymes and energy metabolism CO5: To understand the importance of organ function test and DNA based diagnostics | |
| 7 | Course Description | Acid, Base and Indicators Nutrition Carbohydrate and Protein Chemistry Lipid Chemistry and Fatty acids Enzyme and Energy metabolism Clinical Chemistry | |
| 8 | Outline syllabi Theory | us | |
| | Unit 1 | Acid, Base, Indicators and Nutrition | |
| | | A. Acid- base indicators: Definition, concept, mechanism | CO1 |
| | | of action. B. Importance of nutrition: Calorific values, Respiratory quotient, Energy requirement of a person - Basal metabolic rate, Balanced diet, Recommended dietary allowances | CO1 |
| | | C. Role of carbohydrates, lipids and proteins in diet. | CO1 |

| Unit 2 | Carbohydrate and Protein Chemistry | |
|--------|---|-----|
| | A. Definition, general classification with examples of Carbohydrate and Lipid. B. Glycosidic bond, Structures, composition, sources, | CO2 |
| | properties and functions of Monosaccharides, Disaccharides, Oligosaccharides and Polysaccharides. | CO2 |
| | C. Peptide bond, Biologically important peptides, isoelectric pH, properties of amino acid and structural organisation of protein. | CO2 |
| Unit 3 | Lipid Chemistryand Fatty acids | |
| | A. Definition, classification, properties and functions of lipids. | CO3 |

SEMESTER II

| School: SAHS | | Batch: 2020-2022 | | | | |
|-------------------------|--------------------|--|---------------|--|--|--|
| Prog | gram: M.Sc | Current Academic Year: 2020-2021 | | | | |
| Branch:ClinicalReaserch | | Semester: II | | | | |
| 1 | Course Code | MCR 112 | | | | |
| 2 | Course Title | Systemic Pharmacology | | | | |
| 3 | Credits | 4 | | | | |
| 4 | Contact Hours (L) | 2-2-0 | | | | |
| | Course Type | Compulsory | | | | |
| 5 | Course Objective | At the end of the course the students will be equipped with the basics knowledge about, Medicine which would lay the foundation for their courses in the next semester. | | | | |
| 6 | Course Outcomes | CO1: Knowledge: defining, listing and recognising the drugs. CO:2Comprehension: understanding, characterising, explaining, identifying and locating the various drugs that are useful in treatment and management of diseases. CO3: Application: performing, demonstrating, implementing and applying the concept of basic pharmacology which help in appropriate diagnosis and treatment of systematic diseases. CO4: Analysis: analysing, categorising, comparing and differentiating type of drugs. | | | | |
| 7 | Course Description | At the end of the course the students will be equipped with knowledge about certain concepts, which would lay the fourtheir courses in the next semester. | | | | |
| 8 | Outline syllabus | | CO Mapping | | | |

| | | clinical trials | | | | |
| 6 | Course | On successful completion of this course, student will be able to: | | | | |
| | Outcomes | CO1:Identify the key issues involved in the conduct of a clinical study | | | | |
| | | including investigator and site selection, site management and conflict | | | | |
| | | resolution. | | | | |
| | | CO2:Outline a study level feasibility plan and describe the structure of a study budget | | | | |
| | | CO3:To provide a comprehensive introduction to the clinical research | | | | |
| | | process, conduct & management of clinical trials. | | | | |
| | | CO4:Reporting and managing serious adverse events on site, development | | | | |
| | | of recruitment strategies and clinical study budget. | | | | |
| | | CO5:Staff requirements and construct timelines to target the appropriate | | | | |
| | | study population and to store, shift and dispense a study drug or device as | | | | |
| | | well as how to review some documents, case report forms protocols and | | | | |
| | | study budget | | | | |
| | | | | | | |
| 7 | Course | This course will equip the students with the imperative skills of clinical | | | | |
| | Description | trial management. This course gives a methodical understanding of the | | | | |
| | | core areas of clinical trial management thus enhancing skills and | | | | |

| | | knowledge | e to the leve | el expect | ed | of a Clinica | al Trial Pro | ject M | Ianag | er |

| 5 | Course | 1. to understand the key concepts in the responsible conduct of | | | | |
| | Objective | research a | | | | |
| | | 2. tounderstand how to conduct research that conforms to the highest | | | | |
| | | standards for the protection of human research subjects. | | | | |
| | | 3. To sensitize and equip with knowledge on Pharmacovigilance | | | | |
| | | practices worldwide and on the Indian scenario in detail | | | | |
| | | 4. List four primary perspectives that a pharmacoeconomic analysis | | | | |
| | | can be conducted from and describe how they differ. | | | | |
| | | 5. Discern between different medical cost categories that can be | | | | |
| | | identified, measured, and compared in a | | | | |

| | | pharmacoeconomicanalysis. | | | |
|---|-----------------------|---|----------------|--|--|
| 6 | Course Outcomes | On successful completion of this course, student will be able to: CO1: Revise the principles and practical relevance of ethical issues in clinical research and the legal and ethical provision for the protection of clinical trial subjects. CO2: Value the role of pharmacoepidemiology, Pharmacoeconomics in the lifecycle management of a medicine. CO3: Appraise adverse events/adverse drug reactions in terms of severity and then describe the safety reporting requirements pre and post-approval. CO4: Evaluate the ongoing management of drug safety issues (including risk management plans, periodic safety update reports) and the ongoing benefit/risk assessment throughout the lifecycle of a medicine. CO5: Discuss the collection, evaluation, and reporting of adverse event data in clinical trials | | | |
| 7 | Course Description | This course provides insight in to pharmacoeconomics and it healthcare industry. Also, gives comprehensive knowledge, to | understanding, | | |

| | (L-T-P) | | | | | |
| | Course Type | Compulsory | | | | |
| 5 | Course Objective | To achieve a basic understanding of recombinant DNA technology, human genome structure, Genetic Tests, Prenatal Diagnosis of Genetic Diseases etc. To equip with knowledge of Oncogenes and Malignancy, Detection of Oncogenic activation, Functions of oncogenes To achieve basic understanding of Stem Cell Research and New Targets for Drug Designs | | | | |
| 6 | Course Outcomes | On successful completion of this course, student will be able to: CO1: Employ the scientific method to generate new knowledge, and to solve problems, regarding human heredity. CO2: understand advanced techniques in genome analysis, recombinant DNA technology. CO3: To develop the understanding for Management of inherited human diseases CO4: Demonstrate knowledge of oncogenes and malignancy, their detection and management CO5: synthesize and incorporate the fundamentals of gene and nanotechnology in order to understand how such technology impacts humans. | | | | |
| 7 | Course Description | This course gives in sight into human genetics, oncogenes, stem cell research and Biopharmaceuticals, Re-generative Medicine, Nano technology and Nano medicineetc which will lay foundation and motivate students to pick up and conduct recent challenging research proposals. | | | | |
| 8 | Outline syllabu | | CO Mapping | | | |
| | Unit 1 | Human Genetics | 11 0 | | | |
| | A | Recombinant DNA Technology | CO1, CO2 | | | |
| | В | Genetic Tests, Prenatal Diagnosis of Genetic Diseases | CO1, CO2 | | | |
| | С | Human Genome Project, Gene Therapy | CO1, CO2 | | | |
| | Unit 2 | Cancer Research | | | | |
| | A | Oncogenes and Malignancy | CO4 | | | |
| | В | Detection of Oncogenic activation | CO4 | | | |
| | C | Functions of oncogenes | CO4 | | | |
| | Unit 3 | Stem Cell Research | | | | |
| | A | Cell, growth & regulation | CO1 | | | |
| | В | Proliferative Disorders-I | CO3 | | | |
| | C | Proliferative Disorders-II | CO3 | | | |
| | Unit 4 | New Targets for Drug Designs | 003 | | | |
| | A | Biopharmaceuticals | CO2 | | | |
| | В | Re-generative Medicine | CO2 | | | |
| | С | Others | CO2 | | | |
| | Unit 5 | Nano technology and Nano medicine | 552 | | | |
| | | Timbo celliology and Timbo inculcine | I | | | |

| A | Nano technolo | CO5 | | | | |
|--------------|---------------|---|-----|--|--|--|
| В | Nano medicin | Nano medicine Others | | | | |
