

# Program Curriculum

School of Allied Health Sciences

Bachelor of Radiological Imaging Techniques (Radiology/CT/MRI)

Program CODE SAH0107

Batch 2020-2023

Palul

- 1. Standard Structure of the Program at University Level
- 1.1 Vision, Mission and Core Values of the University

# **Vision of the University**

To serve the society by being a global University of higher learning in pursuit of academic excellence, innovation and nurturing entrepreneurship.

# Mission of the University

- 1. Transformative educational experience
- 2. Enrichment by educational initiatives that encourage global outlook
- 3. Develop research, support disruptive innovations and accelerate entrepreneurship
- 4. Seeking beyond boundaries

## **Core Values**

- Integrity
- Leadership
- Diversity
- Community

#### 1.2 Vision and Mission of the School

## **Vision of the School**

To steer the School of Allied Health Sciences towards excellence in academics, innovation and entrepreneurship by constant endeavors

# **Mission of the School**

- 1. To create the state of the art facility for quality teaching learning, research & innovation
- 2. To incorporate the contemporary standards in teaching & learning
- 3. To inculcate in the students values of integrity and compassion towards the care of patients and society.

# **Core Values**

- Skilled professional
- Multidimensional
- Compassion
- Management

#### 1.3 Programme Educational Objectives (PEO)

#### 1.3.1 Writing Programme Educational Objectives (PEO)

#### PEO1: Disciplinary knowledge and its appropriate application:

This subject will facilitate students to gain relevant disciplinary understanding of the nature, practice and application of Medical Imaging Technology through lectures, Hans on training on imaging machines, computer practical, workshops and presentations. The material will be assessed in the test and the examination

#### PEO2 : Professional skills and their appropriate application

Provide Time management, personal organization and teamwork skills, and communication skills will be developed through the presentation projects.

#### PEO3: Engagement with the needs of society

The subject will enhance the capacity of the students to respond to the needs and grapple with ethical concerns that accompany the practice of Medical Imaging (e.g. the balance between diagnostic accuracy and radiation dose to the patient, the staff and population as a whole).

#### PEO4: Clinical Care

Using a patient/family-centered approach and best evidence, each student will organize and implement the prescribed preventive, investigative and management plans; and will offer appropriate follow-up services.

#### PEO5: Lifelong learning

The student should be committed to continuous improvement in skills and knowledge while harnessing modern tools and technology. Program objectives will aim at making the students being able to: Perform objective self-assessments of their knowledge and skills; learn and refine existing skills; and acquire new skills

#### PEO6: Social Accountability and Responsibility

The students will recognize that allied and healthcare professionals need to be advocates within the health care system, to judiciously manage resources and to acknowledge their social accountability. They have a mandate to serve the community, region and the nation and will hence direct all research and service activities towards addressing their priority health concerns.

# **1.3.2** Map PEOs with Mission Statements:

| PEO Statements | School    | School    |
|----------------|-----------|-----------|
|                | Mission 1 | Mission 2 |
| PEO1:          | 3         | 3         |
| PEO2:          | 3         | 2         |
| PEO3:          | 2         | 3         |
| PEO4:          | 3         | 3         |
| PEO5:          | 3         | 2         |
| PEO6:          | 3         | 3         |

Enter correlation levels 1, 2, or 3 as defined below:

1. Slight (Low) 2. Moderate (Medium) 3. Substantial (High)

## 1.3.3 Program Outcomes (PO's)

PO1 : Apply the knowledge of clinical, diagnostic and Medical physics, Imaging technology, clinical sciences, as well as an understanding of health care delivery diagnostic imaging system.

PO2 : Find, analyze, evaluate and apply the information systematically and shall make a appropriate diagnosis to provide quality of image along with patient care.

PO3 : Demonstrate effective planning abilities including the prevention, detection, radiation protection, diagnosis, and management of patient without compromising image quality.

PO4 : Apply ethical principles like radiation protection and commit to professional ethics and responsibilities and norms of the Imaging techniques practice.

PO5 : Conduct and present research and clinical studies which will contribute to the advancement of Imaging techniques, quality, diagnosis and health sciences.

PO6 : Explain theory of technology, instrumentation and physics in Medical Imaging using discipline specific terminology.

# 1.3.4 Mapping of Program Outcome Vs Program Educational Objectives

|     | PEO1 | PEO2 | PEO3 | PEO4 | PEO5 | PEO6 |
|-----|------|------|------|------|------|------|
| PO1 | 3    | 2    | 1    | 3    | 3    | 3    |
| PO2 | 3    | 3    | 3    | 3    | 2    | 2    |
| PO3 | 2    | 1    | 2    | 3    | 2    | 2    |
| PO4 | 2    | 2    | 3    | 2    | 3    | 3    |
| PO5 | 2    | 3    | 3    | 2    | 3    | 2    |
| PO6 | 3    | 3    | 2    | 1    | 3    | 2    |

1. Slight (Low)

2. Moderate (Medium)

3. Substantial (High)

# 1.3.5 Program Outcome Vs Courses Mapping Table<sup>1</sup>:

| Program Outcome<br>Courses | Course Name   | PO1 | PO2 | PO3 | PO4 | PO5 | PO6 |
|----------------------------|---|-----|-----|-----|-----|-----|-----|

# BIT 104:Human Anatomy as Applied to Radiology & Imaging - I

**Course outcome:** The completion of this course will help in –

defining, listing and recognizing the anatomical structure of the human body.

<u>Comprehension:</u> understanding, characterizing, explaining, identifying and locating the anatomical structure of the human body.

<u>Application</u>: performing, demonstrating, implementing and applying the concept of general anatomy in better understanding the relevance Radiographic Anatomy.

<u>Analysis:</u> analyzing, categorizing, comparing and differentiating the anatomical structure of the human body and applying on imaging technology as radiographic anatomy

# **UNIT – I** Introduction - human body as a whole

- (A) Definitions and terms of anatomy
- (B) Positions and planes
- (C) Types of muscle and difference between them

## **UNIT – II**: Bones and joints

- (A). Classification of bones according to shape, development, regional, structural (macroscopically
- compact bone and spongy bone)
- 2.Parts of young and adult long bone

#### (B)CARTILAGE

1. Different types of cartilage (hyaline, fibro and elastic cartilage)

#### (C)JOINTS

#### 1. Classification of joints

- a) Fibrous joints with example, cartilaginous joints with example
- b) Synovial joint types with example, diagram of typical synovial joint and its characteristic features

# (D) Lymphatic system

# (E) Glands – difference between endocrine and exocrine glands

## **UNIT – III :** Circulatory system

- a) Heart structure and function
- b) Blood supply of heart
- c) Systemic and pulmonary circulation
- d) Difference between artery and vein

# UNIT – IV

# Respiratory system

- a)Parts of respiratory system (nose, nasal cavity, pharynx, larynx, trachea, lung, alveoli)
- b)Bronchopulmonary segments
- c) Lung and pleura
- d) Names of paranasal air sinuses

#### UNIT – V

#### GIT

- a)Parts of GIT- gross anatomy and functions (esophagus, stomach, small intestine and large intestine and liver)
- b) Difference between small and large intestine
- c)Functions of liver and gall bladder
- d)Oral cavity
- e) Names of main salivary glands

# **ANATOMY PRACTICALS:**

Demonstration of all bones

Demonstration of heart and vessels in the body

Demonstration of parts of respiratory system

Demonstration of abdominal viscera

Radiographs of normal bones

# BIT: 109 Human Anatomy as applied to radiology and Imaging -II

<u>Course outcome</u>: The completion of this course will help in –

**<u>Knowledge:</u>** defining, listing and recognizing the anatomical structure of the human body.

<u>Comprehension:</u> understanding, characterizing, explaining, identifying and locating the anatomical structure of the human body.

<u>Application</u>: performing, demonstrating, implementing and applying the concept of general anatomy in better understanding the relevance Radiographic Anatomy.

<u>Analysis:</u> analyzing, categorizing, comparing and differentiating the anatomical structure of the human body and applying on imaging technology as radiographic anatomy

#### UNIT I -

#### **FRACTURE**

Fracture (Types of fractures) and dislocation (Types, Appearance, and practical assessment), (TO BE COVERED UNDER RADIOLOGY)

## UNIT II –

#### Disease

Various diseases of the bones and joints, and its assessment.( TO BE COVERED

#### **UNDER RADIOLOGY**)

#### **UNIT III-**

#### RADIOLOGICAL ANATOMY/ SURFACE ANATOMY.

Surface landmarks of all bones, organs viscera, Joints in relating to organs on the body for radiographic positioning-

#### **UNIT IV-**

Anatomical terminology with regard to location of bones and organs. (**COVERED IN 1**<sup>ST</sup> **SEMESTER**)

# UNIT V -

General introduction to anatomy of excretory system

# UNIT VI –

General introduction to anatomy of Reproductive system

#### **UNIT VII-**

General introduction to anatomy of nervous system.

# **Anatomy Practical**

Demonstration of parts of urinary system.

Demonstration of section of male and female pelvis with organs in situ

Demonstration of parts of head & neck region.

Demonstration of brain and spinal cord. Surface marking. Histology of cartilage and bone.

# DEPARTMENT OF RADIOLOGY SCHOOL OF ALLIED HEALTH SCIENCES, SHARDA UNIVERSITY, GREATER NOIDA

# **Rules for Internship Training Programme**

- 1) For the Degree of Bachelor of Imaging Technology, the students after passing the professional examinations as per the syllabi prescribed by the Sharda University, students shall undergo Six Months compulsory rotatory internship training Programme to develop skill and acquire Technical & clinical knowledge with efficiently handle the imaging machines independently.
- 2) These rules shall be implemented by Department of Radiology, School of Allied Health Sciences, Sharda University, Greater Noida, The evaluation of the interns shall be done very carefully by the In- charge, Internship Training Programme and the Head of the concerned department on the basis of the technical skill, knowledge and ability to handle the imaging machnines and cases independently. The Dean of the college shall have to monitor Internship

Training Programme in collaboration with Heads of the Department and Program coordinators.

3) The Coordinator, Heads of the Program shall be responsible for the maintenance of standard and records of the interns.

#### General -

Internship is a phase of training where in a candidate is expected to learn technical skill, with fair independence in technical, where as to work under supervision at high risk areas; so that at the end of Internship he/ she is capable to handle the imaging machines independently.

The Rules & Regulations recommended by the Department of Radiology & , School of Allied Health Sciences,

- 1) The Dean of SAHS & HOD of radiology shall be authorized for implementation of Internship Programme & also for the issue of Internship completion certificate.
- 2) Internship shall commence not later than One week from the day of declaration of results of 3<sup>rd</sup> yr BRIT. Examination.
- 3) It shall be binding on the candidate to follow strictly, the code of conduct prescribed by the Department of Radiology,& School of Allied Health Sciences.
- 4) Compulsory Internship shall include rotational clinical assignments, Administrative skills over a period of 26 weeks.

On successful completion of Internship, to the satisfaction of the Programm coordinator, Head of Radiology Dept. & the Dean of SAHS, the Internship completion certificate shall be issued by the institution; and it will be forwarded to the Sharda University for the award of B.R.I.T. Degree.

### **OBJECTIVES -**

Radiological imaging encompasses different imaging modalities and processes to image the human body for diagnostic and treatment purposes and therefore plays an important role in initiatives to improve public health for all population groups. Furthermore, Radiological imaging is frequently justified in the follow-up of a disease already diagnosed and/or treated.

At the end of Internship Programme, the candidate shall be able to-

- 1) Handle all imaging machines independently.
- 2) Understand the rationale & basic investigative approach to the Medical system & produced images with minimization of radiation dose without compromising diagnostic e quality effectively or make a timely decision for referral to appropriate specialty.
- 3) Demonstrate skill of managing patients attending duration imaging procedures, by developing skills to use appropriate manipulative techniques and methods
- 4) Develop ability to understand radiation hazard concepts and its protections & use of appropriate devices as per required investigations.

### **INTERNSHIP SCHEDULE -**

Candidate shall be posted to four Rotational Technical assignments of total 26 weeks,

| Modalities             | Department/Place         | Duration |
|------------------------|--------------------------|----------|
|                        |                          |          |
| CT Scan                | Radiology Dept           | 5 weeks  |
| MRI                    | Radiology dept           | 5 weeks  |
| Digital/CR x           |                          |          |
| ray/Special            | Radiology dept           | 4 weeks  |
| inv/Mammography        |                          |          |
|                        | School of Dental         |          |
| Dental                 | Sciences(Radiology dept) | 4 weeks  |
| OT (Ortho)/Cath<br>Lab | Ortho Dept               | 4 weeks  |
| Casualty               | Casualty                 | 4 weeks  |

#### **EVALUATION-**

During the rotational posting, student shall handle the imaging machines learn technical parameters and superficial clinical diagnosis on different modalities and handle the patients & also undertake skills of maintaining administrative records & Maintenance of equipment. The candidate shall maintain a **log book & record** all the events of the respective posting He /She shall be closely monitored by the Program coordinator and senior Technical staff in charge throughout the posting & the same shall also sign in the Log book on completion of the assignment.

There shall be Formative & summative assessment at the end of each of the 4 postings given in the schedules.

#### **LEAVE FOR INTERNS -**

An internee shall be entitled for maximum 6 days leave (not more than 3 days at a time) during six Months period of internship posting.

An internee will not be permitted to avail more than 2 days leave in any department. The leave other than C.L. will not be admissible.

Any leave in excess of above rule or absence from the work on any ground should be treated, as absence and the intern shall have to complete the required attendance as a repeat day. Internees cannot avail casual leave without prior permission to Dean \Principal\HOD/Programm coordnator of the college, in emergency interns should intimate within 24 hours, with supporting reasons to the Dean\Principal \HOD. Any student taking Leave without prior permission will be compensated for 2 days.

Working hours for interns are to be not less than 7 hours per day.

He\She can avail weekly off\ Sunday and national \Govt. holidays permissible to hospital with prior permission of Hospital Authority.

## **Issue of Internship completion certificate**

Internee will be issued internship completion certificate by the Dean only after completion of internship training Programme satisfactorily.
