- To know about R&D and entrepreneurship opportunities in micro and smart irrigation systems.

**2. Event description:** Micro irrigation is a modern method of irrigation; by this method water is irrigated through drippers, sprinklers, foggers and by other emitters on surface or subsurface of the land. *Micro-irrigation*, also called *localised irrigation*, *low volume irrigation*, *low-flow irrigation*, or *trickle irrigation* is an *irrigation* method with lower pressure and flow than a traditional sprinkler system. Low volume *irrigation* is used in agriculture for row crops, orchards, and vineyards.
