

Name of the Event	Webinar on Introduction to R		
Date of the Event	DD	MM	YYYY
	2 nd	November	2020
Timings of the Event	10:30 AM to 12:30 PM		
Location of the Event	Google Meet Link https://meet.google.com/jkf-njhd-vgb School of Humanities and Social Sciences, Block 7, Sharda University		
Sponsor of the Event (if any)	NA		
About the Event (Brief description)	<p>Social science deals with the study of society and the relationship among individuals within society. Social science research provides authentic information to the people that are scientifically proven so that end users can rely upon it. Research can find answers to things that are unknown, filling gaps in knowledge. It is essential to develop a sound methodological base of research among the researchers to cope up with challenges in the field of research. A good research methodology is a key to sound research output. There are many statistical programs that are used in social science research. They differ in multiple ways- ease of use, generality, and cost. 'R' is programming language for data analysis. R has its own LaTeX-like documentation format, which is used to supply comprehensive documentation.</p> <p>The webinar enabled the participants understand the use of R as a language and environment for statistical computing and graphics. Also, made participants aware of the changing demands of the world of work and opportunities.</p>		
Notes, Highlights & dialogs with speaker	<p>Why use R for data analysis? What is quartile deviation? Median is considered to be on which Quartile Deviation? How do we calculate Mean using R? How do we calculate Standard Deviation and Variance using R?</p>		

Dr. Prakash Kumar
