SECTION B: Event report and reflection

1. Event objectives

The objective of this conference was to bring the scholars, scientists, industrialists from all over the world in the IT industry to a common platform to present the on-going researches in the field and hence to foster research relations between the Universities and the industry and Exposing the audience to the need for more development and research in the field and with it the growing need for IT security. This was the 2nd annual academic conference on this theme exploring how Computing, Communication, and intelligent systems could be effectively utilized in teaching, learning, educational administration, and various other fields of practical importance. These technologies have penetrated into virtually all the areas of our day to day life. To effectively benefit from technology applications, it is essential that education professionals set themselves ready for transforming their practices and keep identifying effective ways for transformations in their contexts.
