

Note: Questionnaires on Curriculum Feedback from Stakeholders is attached as Annexure I-A

Feedback Analysis Points
1 Suggested to include topic as per market demand on field taught practical based softwares
2 Some students suggested that structural health monitoring course and earthquake engineering course should be taught to them.
3 Course related to software i.e. BIM and Microsoft project should be taught by taking actual projects.
4 Suggested to include courses based on the current technology used in industries like precast technologies. Students should have knowledge of making CPM charts and Cash Flow in B.Tech. courses.
5 Suggested to include the courses related to geology, NDT and Structural health monitoring.
